Thread: [Uploaded shell but need to find url.](#)

David Laid - October 4, 2017, 2:20 pm

Hello,

so basically i tried many upload section on their site but only where i was able to upload shell was in "contact_us".

the thing is, when i click send and upload shell i cannot find url to this shell.

is there any way to find it?

Nachfolger - October 4, 2017, 2:25 pm

This definately isn't my field of knowledge, but if you watch the Wireshark logs you might be able to see where they upload it to.

Also try a directory scanner.

Thanks for tip, yeah i tought of that too, will try it.

EDIT:

if anyone is experiened in this i would appericate your help.

Still trying to find solution, no success.

but why you didn't know where you upload your shell?

use http live header or tamper data while upload an look for path. :)

regards
