Thread: [Hackforums Live Radio/Podcast?](#)

SIM-1589588 - October 5, 2017, 12:13 pm

Can anyone do this? I'm sure there will be some guys who are good in commentary/Podcasts etc. Hackforums is filled with dramas/action/bitching everyday and I would love to hear someone giving live updates about anything on Hackforums while I am browsing and I'm sure many people will like it.

Whats your opinion?

Stashyy - October 5, 2017, 12:17 pm

People attempted to do a radio and things along the lines of that before. I was even apart of it but people got banned/warned for it I think.

Maybe if the official news team did something like this? Idk

Not too sure tbh.

But basically you'd want a DramaAlert for hf? lol

Anima - October 5, 2017, 12:18 pm

This would be quite awesome

Like 60% of the member who ran the podcast got closed lol (Baghead, Grin, Sir, Yellows etc.)

As Stashy said

A drama alert style show for HF would be very funny to watch, and at the same time, could show people the new updates or something :P

We used to have one of those radio channel things way back in the day.

I was one of the hosts and then it fell though and then another version came back about 2 years ago or last year.

My time as a host, it was quite fun, daily prank calls as well. Lel

I think you should start it again.

I think it's a good idea, I'm sure someone has done it before and it didn't go so well I assume since it's hasn't been happening for a while.

Would be cool to see someone do this, I would but I suck at commentating.

I suck at it too mate, maybe we should do it together ?

Angelus - April 11, 2018, 6:06 pm

Hope I'm not being an annoyance for gravedigging this but yeah I'm heavily interested in starting a podcast, and I think that seeing this thread has given me some ideas as well to make one for the site.

I think we should all definitely work together to make this happen again, and maybe keep it stable and such and not die off quickly.

I'd love to help in any way possible :)

I'd love you (no homo) if you can make this happen.

I am sure there were reasons before as to why it maybe died off, but I think it would be pretty cool to have a hack forums radio and such. I'd definitely give it a listen. If people have the time to create all the hack forums news, I'm sure a radio isn't unachievable.

Woes - April 12, 2018, 2:34 am

That'd be so fucking sick, I wanna be a part of this.

If anybody gets the courage to do this, let me know!

SIM-1589588 - April 12, 2018, 3:17 am

Okay, let's make a group then.

So far we have 4 members who are intrested in making this.

LOL, reminds me of shitty Habbo radio stations in 2008.

Honeybun - April 12, 2018, 11:54 am

I'm on the radio irl for three stations. It'd be cool to do this, I've been thinking about it for a while.

If anybody is serious about this, PM me.

I get paid damn well for it - I'm good lol. I consult for many stations across the USA and I'm well adept in managing, operating, configuring format and pretty much anything else related to a radio station.

We could get this thing sounding "mass-market" if I put some time into it. I've got connections within real-world radio which could help - a lot.

Lynx - April 12, 2018, 12:34 pm

I totally agree.. Would be fun to have some guys reporting the news at the end of the day in the evening.

anyways, I would be there to watch it ^_^

Danny Khalifa - April 12, 2018, 3:16 pm

That actually would be pretty awesome.

Sound like a good deal, but I suck at commentating lol

Corver - April 12, 2018, 3:24 pm

I'm not sure what the rules are, but if anyone is down to make this I can make some graphics (animated or static) for the show no problem. I also have an expansive background in video production and tools . Sooo if anyone is feeling squirrely just hmu

Those were the shit, I used to line up in their rooms waiting for free furni.

Vegeta - April 12, 2018, 4:21 pm

Would be neat to see. Maybe someone can get Omni's approval and make it some sort of group like the writers.

luke - April 12, 2018, 4:25 pm

Maybe you could do an ads section on the podcast, charge \$XX for someone to promote their ebooks.

test - April 12, 2018, 9:51 pm

The only issue with this I see is that if it is in any way HackForums related then it will overlap with the HF News.

(Apr 12, 2018 04:25 PM)Stratify Wrote: [\[CITE\]](#) Maybe you could do an ads section on the podcast, charge \$XX for someone to promote their ebooks.

That's actually a really good idea depending how popular the podcast is.

Crystallize. - April 12, 2018, 9:52 pm

I can host a live radio for songs only I will not be able to comment though, what do you guys think?
