Thread: [100% cpu in resmon no task in task manager or process explorer that is taking cpu](#)

salad122424 - October 7, 2017, 4:22 am

hello i am really worried i have some very sneaky bitcoin miner or something like that. pls help me :(

5chn4pp - October 7, 2017, 4:38 am

Please download [Farbar Recovery Scan Tool](#) and save it to your Desktop.

Note: You need to run the version compatible with your system. If you are not sure which version applies to your system download both of them and try to run them. Only one of them will run on your system, that will be the right version.

Right click to run as administrator. When the tool opens click Yes to disclaimer.

Press Scan button.

It will produce logs called FRST.txt and Addition.txt in the same directory the tool is run from.

Please copy and paste the logs back here.

FRST shows your cpu at 49%, where are you reading that 100% usage?

Could you provide a screenshot?

salad122424 - October 7, 2017, 5:54 am

here it is: imgur.com/a/43Hpo

5chn4pp - October 7, 2017, 6:25 am

That's not how it works... Your picture shows your cpu at 27% which is totally normal, I think you have misunderstood how resource monitor works.

For example:

<https://superuser.com/questions/256921/what-does-the-maximum-frequency-number-mean-in-the-windows-resource-monitor>
