Thread: [TRANSCENDENCE - Recruitment #1 | PENTESTING, HARDWARE HACKING, BUG HUNTING](#)

ra1d - October 11, 2017, 3:38 pm

Recruitment

Recruitment has begun. I am sending out PM's to members who have contacted me.

About:

TRANSCENDENCE is a group of fellows who are interested in the progress of technology, specifically hardware hacking, pentesting and the likes of exploiting vulnerable systems. Our main goal is to push the agenda of hacking, ranging from offensive, hardware and defensive.

Recruitment process:

Do you have a strong interest in transhumanism? Do you love pentesting? Are you a passionate learner and want to learn from the best?

If any of the above sounds like you then feel free to shoot me a PM or reply to this thread with your experiences, qualities and why you want to join this group.

Chief - October 11, 2017, 3:46 pm

I have applied using my finest application. Pls accept me sir

Jake???????????????? - October 11, 2017, 3:46 pm

I sent you a PM, I hope I have a chance. :)

Parks - October 11, 2017, 4:06 pm

Sent you my application let me in !

Faith Connors - October 11, 2017, 4:07 pm

hope it doesnt die so fast like aequitas did

at least your direction is a little bit different while keeping the theme. good luck.

Lukas - October 11, 2017, 4:13 pm

Start doing buy-ins. Your group has been public long enough.

POLY MATH - October 11, 2017, 4:20 pm

I want in. I am posting this as a remind to come back.

Deany - October 11, 2017, 4:24 pm

I'll hack all the weebies now let me in bb

Crystallize. - October 11, 2017, 4:26 pm
Goodluck with your group ra1d.

Slavoj Žižek - October 11, 2017, 4:29 pm
good luck with this new anime group ra1d

Baud - October 11, 2017, 6:09 pm
I have high hopes for this group, it looks very interesting and promising.

Kenjataimu - October 11, 2017, 8:04 pm
I have been waiting for this and its finally here!

Bondage - October 12, 2017, 4:20 am
I also have been waiting for this also was pming OP for when to join, im into the future but not hacking future :))) will you accept members even if they are into something else for exemple crypto and other things ?

TopKekeroni - October 12, 2017, 7:42 am
This group has so much potential, can't wait to apply.

oRequiem - October 12, 2017, 1:41 pm
Looking forward to this ra1d, good luck with the group and everyone who has a chance to get in!

Excalibur' - October 13, 2017, 4:02 am
Looks great, can't wait for the recruitment thread to open!

DevNet - October 13, 2017, 5:43 am
i have a question can i join

ra1d - October 13, 2017, 10:53 am
(Oct 13, 2017 05:43 AM)DevNet Wrote: [\[CITE\]](#) i have a question can i join
No you are blacklisted.

Dredd - October 13, 2017, 11:13 am
I am best pen tester around everyone know that, thxs for invite

Dredd

ra1d - October 13, 2017, 2:47 pm
Recruitment opening in less than 24 hours from now!

Lukas - October 13, 2017, 4:47 pm
(Oct 13, 2017 02:47 PM)ra1d Wrote: [\[CITE\]](#) Recruitment opening in less than 24 hours from now!

Hi, can you explain yourself, sir.

ra1d - October 13, 2017, 5:13 pm
(Oct 13, 2017 04:47 PM)Lukas Wrote: [\[CITE\]](#)

Hi, can you explain yourself, sir.
I have a life besides HF.
That's how.

Lukas - October 13, 2017, 5:16 pm

(Oct 13, 2017 05:13 PM)ra1d Wrote: [\[CITE\]](#) I have a life besides HF.
That's how.
HF is your life, quit lying.

Excalibur - October 14, 2017, 5:19 am

(Oct 13, 2017 05:13 PM)ra1d Wrote: [\[CITE\]](#) I have a life besides HF.
That's how.
Lord has spoken, LMAO!

ra1d - October 14, 2017, 7:06 pm

Recruitment is live, go ahead!

sHAY - October 14, 2017, 7:09 pm

Pretty cool waiting for my invite.

Best of luck to everyone applying

TopKekeroni - October 14, 2017, 9:30 pm

Good luck to everyone applying.

Friedrich Nietzsche - October 14, 2017, 10:53 pm

Do you have a strong interest in transhumanism?

Friedrich Nietzsche was arguably the ancestor of Transhumanism. His philosophy of the Übermensch and self-actualization provided profound influences upon the concept and growth of the Transhumanist ideology as well. As to quote Stefan Sorgner, "Nietzsche upheld that the concept of the overhuman is the meaning of the earth. I think that the relevance of the posthuman can only be fully appreciated if one acknowledges that its ultimate foundation is that it gives meaning to scientifically minded people" ("Nietzsche, the Overhuman, and Transhumanism"). One needs to look no further than Nietzsche's great works to see the theme of this self-overcoming transhumanist Übermensch:

"I teach you the overman. Man is something that shall be overcome. What have you done to overcome him?" ("Thus Spoke Zarathustra" 12)

"Life wants to climb and to overcome itself climbing" ("Thus Spoke Zarathustra" 101)

"Verily, I say unto you: good and evil that are not transitory, do not exist. Driven on by themselves, they must overcome themselves again and again." ("Thus Spoke Zarathustra" 116)

So what is, in essence, the difference between modern transhumanism and Nietzsche's overman?

The answer lies within the aspect that's being transcended. While modern transhumanists often focuses on a biological and technological aspect of transhumanism, Nietzsche focused on a different aspect: psychology. To overcome man, Nietzsche asserted, one must reevaluate his values, via the mean of Nihilism. It is then that "the highest values devalue themselves" ("Will to Power"), which then leads to the Death of God. It is then, that one can forge his own values, and

truly become a psychological overman. He is then able to distinguish between "Good and evil", and "Good and bad" ("On the Genealogy of Morals", 17) and can make the proclamation: "This is my good and evil" to silence all those who proclaims, "Good for all, evil for all." (Thus Spoke Zarathustra, 194).

As a Nietzschean and someone whose HF's username is Friedrich Nietzsche, I would like to emphasize my Nietzschean view of the psychological transhumanism and the vision of the Übermensch and assert my interest, along with my namesake's profound impact upon transhumanist ideologies.

Works cited:

Nietzsche, Friedrich Wilhelm. Thus Spoke Zarathustra. Translated by Walter Kaufmann, Penguin Books, 1982.

Nietzsche, Friedrich Wilhelm. On the Genealogies of Morals and Ecce Homo. Translated by Walter Kaufmann, Vintage books, div. of Random House, 1967

Sorgner, S. L. 2009. Nietzsche, the overhuman, and transhumanism. Journal of Evolution and Technology 20(1): 29-42.

Do you love pentesting?

I pentest AVs daily with my crypter and malware.

Are you a passionate learner and want to learn from the best?

Yes, but I must pose one question: will there truly be the best in the group? After all, "best" is 1) very much subjective, someone who's better than you might not be better than me and vice versa 2) very much dependent on who is in the group as well as 3) being very difficult to identify sometimes.

Faith Connors - October 14, 2017, 11:17 pm

this is one of the only people on this forum that actually understands nietzsche

hell, not even just the forum, just ever. the term ubermensch was so different than what the nazis made it out to be. guess thats what you get when crazy sisterbitch sells all the rights to the nazis but whatever.

Pronouncer - October 15, 2017, 5:14 am

Good luck to anyone getting into this. Im sure it'll be great for all of you. Nice to see a decent group around. Aha I don't think I'll ever get in. As I said good luck raid is a great guy you'll enjoy it

Shelltp - October 15, 2017, 12:58 pm

Personally I can't say I know anything about trans-humanism however I may do some research :P, and yes I do have a love for pentesting always have had an interest (I may not be good at it but I've always loved seeing how things work and what their vulnerabilities are).I'm young, very young in fact (15 almost 16) I don't have a problem with disclosing that. I'm still at school, yes but I want my career to be involved with this. I'm hoping on going through certain degrees at university and becoming a CSE or CNE. You may not accept me which is fine, any feedback would be somewhat helpful I guess? Not too sure. I just need guidance. I'm willing to learn a lot, and put hours in. thanks. Have a good one, and too everyone who applied etc, good luck to you all.

Also yes I'm new to HF, how's it going?

ra1d - October 15, 2017, 2:19 pm

After all, "best" is 1) very much subjective, someone who's better than you might not be better than me and vice versa 2) very much dependent on who is in the group as well as 3) being very difficult to identify sometimes. You're a well versed person.

I will be sending you a private message soon enough.

sLiCkToR - October 15, 2017, 3:07 pm

Do I have a strong interest in transhumanism? I find the base idea of transhumanism an interesting concept and I do agree with it but I don't have nearly enough time to worry or give too much thought to it.

Do I love pentesting? Yes, I do pentesting against my software and other software every time I can to ensure I patch all of the loose ends of my anti-cheat before they are exploited by others.

Am I a passionate learner and want to learn from the best? I love learning new things and finding new stuff that helps me with what I'm doing but I enjoy it the most doing it by myself, though I would definitely not mind to in case I somehow cannot find or figure out something by myself.

Hat333 - October 15, 2017, 3:24 pm

Hey there :)

I have to admit that I didn't know about transhumanism until I looked it up after seeing this post but I'm pretty much flashed. Since I started getting further and further into programmin I started reading papers on neural networks, the connections between synapses and artificial intelligence in general. As I see stuff like that is also a big part of it, which means you can count me in.

But for now, lets get this on. I've been programing since about 10 years now, got across from perl and python, over php and javascript to java and delphi.

Everything I've learned was most of the time through books in my freetime because I wanted to understand what was going on in the background, the stuff that no one is supposed to see as a normal user.

Four years in I started to work on projects and they got bigger from year to year.

Now I'm working for a It Company and help them on the side with pen testing of they're webservice. I got into the whole cracking/hacking stuff three to four years ago but never had a point to get started with some real programing for it, using only open source tools I've found somewhere in kali or on the web.

Getting back to the main points, I'm quick at learning, understanding of big systems and their connections.

I would love to join you guys because I think that it would be a great opportunity to learn from you and that I can help you a lot when it comes to programing and looking at problems from a different angle.

At the end I just want to say that Security is where I want to go. I'm currently finishing my bachelor of applied computer science and I will start my master degree in security next year.

Greetings

Hat :)

POLY MATH - October 15, 2017, 3:26 pm

Waiting to see who gets accepted before applying. Really hoping to see some HQ Members

Cimex - October 15, 2017, 5:35 pm

Good luck to everyone applying. I see a lot of potential in this group too with the members in there.

ra1d - October 15, 2017, 5:37 pm

Don't get discouraged if I haven't replied to you yet.

I promise to reply to everyone who has applied, I've gotten a lot of PM's.

Thanks for showing so much interest!

Changement - October 15, 2017, 5:51 pm

Best of luck with the group Ra1d!

Lynxsec - October 15, 2017, 8:37 pm

Hello, I am interested in joining this group.

A little about me:

For me, it all began with making Ps2 Socom2 cheatcodes for online use (bluelock). The website i learned from was hacked and I was amazed.

So i taught myself how to hack a website of course!

Over the years this lead to a lot of different interests.

Coding (c, asm, java, python, bash)

wifi hacking, mobile hacking, and more.

Completed A+, Network+, Security+, and CCNA training between the years of 2005-09

Took a step away from hacking and found an interest in nature for quite some time. After a while, i decided to get back into the swing of things. Retrained for Security+ and CEH 2 years ago and fell in love with pentesting. As of lately ive been picking up more interest in coding yet again as i am developing applications in my workplace.

Would just like to be a part of something as i am not finding many people in the outside world moving forward or chasing a passion.

Do you have a strong interest in transhumanism?

?

Do you love pentesting?

?

Are you a passionate learner and want to learn from the best?

If ive learned something, its that being the smartest person in the room means I need to find another room!

Give me a shout!

hi uhm i have a question am i still on the blacklist or was that just a silly joke

Aryan_Ahir - October 16, 2017, 11:37 am

Hey i want to learn... Can i get Chance???

Elitas - October 16, 2017, 11:48 am

Hi, I've been interested in hacking for some time now and I code a lot in my job. I'm moving into more cyber security in my field of work and would be interested in sharing my knowledge with

Transcendence but also learning from people in the group. Not sure how advanced you guys are at hacking, but whether I'd be a mentor or student would depend on your levels. I'm sure I'd be able to do a little bit of both.

OxfordDictionary - October 17, 2017, 12:09 am

Country: US

Age: 19

Discord: Oxford#1541

Reason: I have always wanted to learn about sql, rats, fraud, keylogging, trojans ect and know how to protect myself and others from this. Since I was young I had always wanted to know how people write a rat or steal a creditcard from somewhere or dox someone. As time progressed I had learned to dox and use databases to my advantage. But I asked myself how do people get Databases, how to people steal credit cards how would someone be smart enough to hack into the NSA/NASA. This was when I dedicated my time to hacking and how to stop people from hacking myself. I would consider myself basic-intermediate in Fraud, Sql, Ratting, keylogging

mohammedalmasry - October 17, 2017, 11:45 am

Hi :) , i hope joining i have some knowledge in pentesting at general and iam studying SANS 560 for now beside some webapp pentesting so i will be happy to be there with all of these great people

Night Fury - October 17, 2017, 5:35 pm

This group looks cool. Hope it turns out awesome. Good luck, dude.

ra1d - October 19, 2017, 7:06 am

Will be sending responses to a lot of people today!

Sorry for the delay.

•^v^-[bLacKn3x]-^v^• - October 19, 2017, 10:12 am

hi ra1d,

i love pentesting.

main skill: SQL INJECTION

programming skills: php,sql,html/css && python

ps: i know you from n0torious gr0up.

hope i get a chance :)

ra1d - October 25, 2017, 6:21 am

Recruitment is sort of on hold until HF is sorted out.

Feel free to still PM me though, I will not be giving any concluding answers on your application for a bit though!

Proximity__01 - November 1, 2017, 4:36 pm

Hello fellas,

I know there are a Lot of people WHO want to join, and I have a pretty empty Profile, but I can Tell you that you won't regret recruiting me. My Name is Michael and I am from Central Europe. I am currently 19yo and I am studying programming with the specialization IOT. I am programming since about 8-9 years, and I also have pentesting experience.

Regards

Michael

Private Equity - November 1, 2017, 4:54 pm

i hate trannys yes, i join pls
