lol if there was something giving you 7 btc a roll you wouldn't be sitting here posting it on youtube. you'd be a millionaire by now

hackerease - October 8, 2017, 9:43 pm

Yes, I would. The script works only one time per person and not every time so i have decided to share the script with others as well so they too can get 7 BTC in few seconds .

lol if that was the case. you can still pretend to be another person or use another person's identity so what's the point

Do not believe this guys, all are scammers, fraud

I paid 0.015 btc and script is not working.
they said :) country ip issue and they wanted 0.017 btc more
This is new style of scammers;
early script sellers are used to do no answer or not working script after your payment
than this style appeared;
as if they are good guys, trying to do something but something(!) happened about customer's contry
ip :) not about them, if cstomer pays more btc script will work :)

I paid and scammed YOU DO NOT PAY real profiles.
I am writing to real profiles because many of profiles on commenters are fake :)
on their youtube videos they say to everbody;
"message us our team will help u in each and every way" but script is not working and they want
more btc :) after more after more

their explanations to us about scrip;
"currently we sold the script in US and Canada some were from Afghanistan and UK"
BUT
when you look up in your youtube video commenters' profiles who announced they bought script
are asian, russian arab etc.

* When you serach ip location which gives error on script 154.124.33.36 it is located Senegal :)

I will share their scrip below and the scrip they send us is not alike on their youtube videos

Finally,
When I wanted refund they wrote me "asshole" finally.

This is their style of doing business.

All whatssup dialouge screenshots available, whoever wants I can share. (the screenshots will be
on google drive and dropbox asap)

Do not believe this guys, all are scammers, fraud

This just balls down to if it seems too good to be true then it is I mean if you could make 7btc they'd
be selling this for a lot of money if it was legit

TheRealNapster - January 11, 2018, 11:26 pm

Imao 7 BTC = almost 100k as of today ...

Nobody would give this for free and still no pictures/videos of withdrawals or bank accounts proof.
clearly, OP wants to share a suspicious "script"
P.S. a member with -3 rep trying to share this lol
