Thread: [Suggest me where to invest.](#)

Ninja™ - October 8, 2017, 7:19 pm

Hi guys,

New to crypto section.

So I have finally decided to invest money in crypto.

Here are questions I have in mind:

Q.Is blockchain reliable , I have all my bitcoin and eth in there?

Q.How can I save them offline? I looked some articles but they were hard as fuck either I didnt read good ones Or I am too dumb.

Q. Where can I buy more coins?

Q. What should I invest in ? I have budget of 2000\$

Q. Am I too late to profit from the coins hype?

Q.Any site to keep track of new coins and existing coins rates?

Thank you for helping me out.

Cryptic™ - October 8, 2017, 7:20 pm

For offline storage get a Ledger Nano S hardware wallet. Your other options are a paper wallet or a wallet you generate on an offline device that will never touch the internet.

Ledger Nano S is the best option if you wanna spend a few bucks.

Q.Is blockchain reliable , I have all my bitcoin and eth in there?

The blockchain is the network that is used to send transactions. As far as reliability goes, you can't do much about it lol

Q.How can I save them offline? I looked some articles but they were hard as fuck either I didnt read good ones Or I am too dumb.

Nano s ledger as cryptic said

Q. Where can I buy more coins?

Bittrex is the only one I like

Q. What should I invest in ? I have budget of 2000\$

At this point, btc eth or NEO

Q. Am I too late to profit from the coins hype?

Nope. Metropolis is due next week for eth and the hardfork for btc the week after.

Q.Any site to keep track of new coins and existing coins rates?

Coinmarket

Here are questions I have in mind:

Code Q. Is blockchain reliable, I have all my bitcoin and eth in there? Yes the Blockchain is reliable
Code Q. How can I save them offline? I looked some articles but they were hard as fuck either I didn't read good ones Or I am too dumb. Try reading my thread and if you still don't understand, PM me

[Storing your crypto currency and keeping it safe](#)

Code Q. Where can I buy more coins? Depends on what coins you want to invest in. I personally use Coinbase. However they only support BTC/LTC/ETH right now. If you want to buy other coins, you can use an exchange site like Bittrex or Polo.

Code Q. What should I invest in? I have budget of 2000\$ I would suggest looking in ETH and holding long term. If you are interested in ICO coins, you might want to take a look at my Mega thread as I do ICO coin reviews. [EAGERKIDS DISCUSSION THREAD](#)

Code Q. Am I too late to profit from the coins hype?

Crypto currency is very new still and in the early stage. It is not too late

Code Q. Any site to keep track of new coins and existing coins rates? You can use [CoinMarketCap](#)

If you invest, you can use [Coininventory](#) for the investment portfolio tracker. And it is also a social media site to talk with other users about crypto currency. PM me if you have any questions on it (I am a staff member.) 100% free, no ads
