Allelujah - October 9, 2017, 7:51 am

Looks alright. Good luck with finding who you're looking for.

Jas. - October 9, 2017, 7:53 am

Just from the preview photo, it looks like a group with a lot to offer for its own members.

Wish the best for the group and maybe in the future when I'm more experienced on the topics this group revolves around I'll apply!

Good luck!

Crystallize. - October 9, 2017, 9:46 am

Thank you guys,

I'm receiving quite good applications via PM.

Keep them coming!

We are focused mainly on Hacking,Programming,Private Investigations, but we also focus on marketing and everything else in general.

First it was mainly focused on hacking now we are also allowing marketing/crypto talk etc.

Looks like an interesting idea for a subforum. Cannot wait to see how things turn out. Good luck, Crystallize!

Nebo - October 9, 2017, 2:32 pm

Good luck, I wish you a lot of success with the group.

Sinincorporated - October 9, 2017, 5:47 pm

I'm going to put my torque application in for Revelations as soon as I can get this hf account upgrade :D. Sorry that it is taking me a few days, ? I didn't know that I had to upgrade my account to join a group.

Crystallize. - October 10, 2017, 2:49 am

More contribution/s to the sf by our member ?

Biggy - October 10, 2017, 3:38 am

150% vouch for this group, I just met Crystallize and he's instantly one of the coolest people I've met on this forum, great stand up dude who you can easily get along with.

Great group to be apart of! Get your applications in.

Thank you.

We are still recruiting via PMs

VirtualFrost - October 10, 2017, 5:35 pm

I didn't think Torque would be a group to go outside their original niche. Good luck with this I guess, does another group do the same similar niche? This all feels familiar.

Torque itself hasn't changed niche. What's happened here is that OP was looking to rent a group Subforum [thread here](#). We had a Subforum that had been unused for 9 months so it's now bring rented out to OP. I should mention as well that Revelation members aren't permitted to post in the Torque forum, only the Revelation SF.

I know but it's so messed up.

First we were focused only in hacking and I got only few applications, when we also decided to go with marketing and other stuff I got a shitton of PMs.

This is where you're wrong.

Quality>Quantity

Posting here to keep this thread on top and to confirm my group participation request through PM towards OP.

I also strongly disagree with the poster 2 posts above this one ?

And your point is...?

I never said we create custom tools, members are free to do so.

We have unique tutorials in the SF and we post daily shells,cPanels etc.

It's just a SF not a group so don't take it to heart.

Antisocial - *October 12, 2017, 3:48 am*

Looks like a really good group!
