Thread: [PrivacyHost Launching In 1 \(ONE\) Week](#)

Mooncake - October 9, 2017, 3:54 pm

Hello, my fellow forum-mates.

I have some exciting news!

PrivacyHost is launching in one week. What is PrivacyHost?

Simple. A hosting service, 100% free, ran on donations from its users, that support hosting any and everything, except child pornography.

I am building a paid team, to run support for this amazing project. Please contact me to become aligned with the project and see how you can make some extra funds monthly.

Just a few points;

All servers are hosted in Korea.

Support agents interested would be paid.

The project is free, and relies only on donations.

We don't take any site down, we literally don't care unless it's child porn or something.

[contract=tid]Start Contract[/contract]

Do you take us down if we get SpamHaus-ed?

Best regards

Glad to hear that, let me know when the service is online, I can pay for a VPS or too if available.

Will you be offering shared hosting only? Or Dedi/VPS hosting as well?

Mooncake - October 9, 2017, 4:23 pm

We are starting with shared hosting. As it grows, we'd be able to offer dedicated services.

Our challenge is, Korea doesn't have high bandwidth solutions along with the lack of legal presence that we capitalize on.

Really? I thought Korea was all networked up? Don't they have the fastest ISPs on average in the world? Or is that just consumer focused?

It is, but we're doing a free solution :)

Once things grow, we'd be able to provide more intensive services.

Thanks, we literally blocking nothing from being hosted.

SIM-3601851 - October 18, 2017, 6:44 pm

Any update on this? Still planning to launch soon?

Mooncake - October 18, 2017, 8:45 pm

Yes, hopefully in 48 hours.

MaxiPads889 - October 18, 2017, 9:23 pm

Whats the long term goal for this?

Mooncake - October 19, 2017, 5:32 pm
