Thread: [What would this be considered?](#)

Allergy - October 9, 2017, 6:24 pm

So my friend bought a client that has hacks for GTA V but in order to use it the client requires you to login using a e-mail and password.

We have no intention on leaking and selling the client we just all don't want to pay for so is there anyway of removing the login, or certificates or just a way to bypass it so we don't get it revoked

I'm a curious learner and please don't waste your time telling me it's wrong and other things of that nature I know it's possible in some way or another but hey that's why I'm here

CyberStrike - October 9, 2017, 6:35 pm

hmm it could be that the person who created it steals credentials for the game ... I would try it on a VM with a crap account you wouldn't care about if it was stolen for sure. On your host machine run wireshark and see what kind of traffic it sends out and to where.

Deany - October 9, 2017, 6:39 pm

Some programs require a hardware ID (HWID) so they can't be shared or sold could it be that?

Major League - October 9, 2017, 6:45 pm

I'm curious as to what exactly you're asking.

SIM-947411 - October 10, 2017, 9:34 am

try reverse engineering although it's a hard process

Temp_UIDZAY - October 10, 2017, 6:42 pm

Bingo, (Ballad) with the above post, although very discreet the HWID lock will not allow you to share licenses. With that being said, if you are asking how to do this, you will not be able to do this task in most universes.

Even I, would struggle with it, I'm sure someone on here could do it for you, that of which I cannot recommend but you would spend more money cracking it than actual per license probably.

THC - October 11, 2017, 8:37 am

Sounds like you're trying to crack it.

As other members mentioned, the subscription is likely hwid bound. It'd take a pretty darn skilled reverse engineer to crack that for you.
