Thread: [Namecheap - HOSTING FOR A BUCK \(1 year\) + free domain and whoisguard](#)

tcsh - October 10, 2017, 6:24 am

Not sure where to post this to give people a heads up so I'm sorry if this isn't the right section.

Namecheap currently has a deal offering their Value (basic) hosting package for \$1. It's normally \$9.88. It also gives you a free .website domain + whoisguard. Offer is for 1 year.

It comes with 20GB SSD space, unmetered bandwidth and you can host up to 3 websites. ([See the package here](#))

What can you buy for a dollar these days? How about hosting from Namecheap? While supplies last, get a Value Hosting Plan for just \$1 using coupon code HOST4ABUCK.**

I'm sure some of you might be interested ?

I got one for testing purposes of various things I plan on developing the next couple of months. I'll obviously drop it after the year

Nice share. Namecheap comes up with these plans every year and take the sales by the storms.

Sorry, forgot about the Hosting section. I'll close this.
