Sickness - November 17, 2017, 7:31 am

WEBSITE HAS BEEN UPDATED, ENJOY!

We are an automatic service that scrapes proxies and checks them to give you HQ and working proxies.

We serve HTTP/s and SOCKS4/5 proxies.

Looking at this video you will know how our website works:

[Maximalism](#)'s Service Review for: "[\[24/7\] PROXIES24.com >> << BIGGEST PROXY DB >> << VERY CHEAP >> << SOCKS4/5 & HTTP >>](#)" - Requested by: [Sickness](#).

Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your eBook that you are selling.

Upon reviewing the seller's account, I have found notable information that is as follows:Join Date: 12-16-2016

Time Spent Online: 2 Months, 23 Hours, 27 Minutes, 35 Seconds

Reputation Count: 424 (Positive: 201/213 / Neutral: 4/213 / Negative: 8/213)

Detailed Review:

After having messages sent back and forth between this user and me, one of the first things I noticed was his / her response time. Regarding this, I would say that the user's response time could definitely be improved. It simply could be timezone issues, however, the user has not been online for 12+ hours since the date of this post.

Regarding the user's actual service, I noticed that the website is clearly custom-made, and the design is overall great. The user clearly has taken mass amounts of time to develop / have someone develop his site, as well as design / have someone design his thread design. The user has provided a step-by-step tutorial guide on how their website works via YouTube and has multiple options of contact with an auto-buy system setup for ease of use.

Now, let's talk about the actual quality of the user's proxies. Overall, I noticed that the proxies were all they stated, and are of very high quality. I personally had no issues to test with the support team, but from my personal experience dealing with the user, I would say that the support team is more than likely a group of highly qualified individuals to answer any questions hand-picked by this user. As for the pricing goes, I believe that this user's prices are unbeatable. The pricing goes as follows:

Weekly Plan: \$4.99

Monthly Plan: \$7.49

Yearly Plan: \$45.99

Comparing these prices to other user services, it seems as if the prices are great. Many of the users here on the forum price their proxies based on each proxy rather than a specific subscription with unlimited prices. This user instead, decided to take the subscription route, and it seems as if he is doing substantially well. Additionally, you need to take into account that every proxy is checked on an hourly basis, with thousands of proxies ready to use.

Final Thoughts:

Overall I believe this service is very high quality. The user has taken the time to make his service the best it could be more than likely investing \$1,000+ into the overall project. The user's response rate definitely needs to be improved upon, however, that is the only negative I can see with this specific service. Like I said previously, I believe the actual site's support team is not simply one person, rather other qualified individuals. There aren't many things you could improve upon at this point, but something I would highly recommend is to purchase a sticky in the Premium Sellers Section to help gain more customers.

Just put some minor API improvements online as its proving to be used a bit. Come & check it out!

Specs - December 13, 2017, 11:04 am

Proxies24 underwent a few changes this week. Weekly & monthly prices have also increased a little so the thread design is currently incorrect until fixed. Got a lot more plans to update the service later this week. Come give it a shot!

Specs - December 16, 2017, 12:54 pm

Just updated the service yet again with a complete API system overhaul. API tokens now differ from login tokens and you will be able to find this token once logged into the panel. There is now also a captcha added to the login page as an improved security measure. The thread design & title prices are currently yet to be updated due to Sickness's temp ban. Everything will be updated when

possible.

Thanks to the current customers, we look forward to welcoming new ones!

Specs - December 20, 2017, 6:18 am

A few small bug fixes have just been put out & work on a free proxy list page has begun. Expect that live on the site shortly. In the meantime, come and checkout the service!

Sickness - December 22, 2017, 12:06 am

Back after being banned, made a lot of errors. Anyways guys I need to say that we will switching to coinpayments soon as we finish to develop the full system.

Thanks!

Sickness - December 24, 2017, 1:33 am

We will be changing selly to coinpayments, and we will have new features soon.

Also you will be receiving emails with the new updates.

Stay tuned.

You need to add that ASAP. The whole point of getting proxies, it's to know where the proxy is from without having to check it manually.

Add that and you will attract a of customers.

Like myself, I would of bought the 1 year package ASAP if you had that simple feature but I'm not going to start checking proxy by proxy just to know the location.

You can easily add that feature using a public API or even cURL

I've been using this for close to twenty days. Most of the days there's 10-12k socks4/5 available from which you could get 400 or so working. There's some days like today where the website only has 1.6k socks 4/5 and after running them through my checker, I only get 4-5 working and the rest are dead. Not really hq socks5 but more of convenience instead of sourcing them from multiple different places.

Proxies are shared with about 100 customers. Its obvious that on popular websites you are going to get low amount of proxies working.
