These obtained legally?

Just curious.

These codes are obtained in unethical manners, and OP stated that there is no chance of getting your steam banned as he has been selling this for over the past 2 years.

Might test him out and report back.

Let's put it this way... If they are carded (which steam is known for being easy to card) then your account does get banned) so I would weigh this risk before you redeem it on ur personal account.
