sXe-Veganarcho - March 11, 2009, 12:08 pm

Why not prevent nubes from posting links, make it so you need 50 posts and admin approval before links can be posted.or something else?

doomster - March 11, 2009, 12:24 pm

Good Idea sXe-Veganarcho..It Will Be GOod If They Want To POrt The Link They Must PM Staffs And From Their Approval Only they Can Post The Link..

Are you fucking ignorant? You spam these forums like you're allowed to or something. And then ignore the simple fact you don't know shit about anything. Also, don't call someone stupid when you can't even spell right to do so.

SiMpLy ThE BeSt - April 4, 2009, 5:10 am

And what is spelled wrong ???

IBTL. I'm assuming In Before The Lock of T3H SH17 7HR3AD!

Rizhais - April 4, 2009, 7:16 am

People why do you need credit card generators? I have one, it makes cc, with valid info, but it's unusable on buy sites.

They're unusable, because the sites send \$_POST to cc processor, which checks if the cc is in databa.

CC generator may only find a real person CC, which is unbelieveler than 1:1'000'000.

In other words: CC generators are waste of time.

EDIT: If you were going to use a CC generator to scam people by selling CC generated CCs, then no comments...
