Thread: [Shared folder connected](#)

tahirprince4 - October 11, 2017, 7:39 am

Step by step How to View Who Connected to a Shared Folder:

1. Open Run (Windows logo + R) and type fsmgmt.msc.

after that a new window will appear.

4 Steps How to View Who Connected to a Shared Folder

2. There is three sub menu "SHARES", "SESSIONS", and "OPEN FILES". We will start from shares first.

4 Steps How to View Who Connected to a Shared Folder

in this sub menu you can view which folder you've already shared, because sometimes we do share the folder but forget to stop the share and the file still accessible from the network.

3. On the sessions sub menu, you can look to the following picture

4 Steps How to View Who Connected to a Shared Folder

If there's someone accessing your shared folder, it will shown here the user including their IP address and the time they already spent inside the shared folder.

4. The last sub menu is open files,

4 Steps How to View Who Connected to a Shared Folder

In this sub menu you can view the activity of the users that accessing your shared folder files.

Conclusion:

1. To stop the folder sharing, you can view the sharing folder location from the shares sub menu and go to the directory directly and you can stop the folder sharing from there.

hope it useful ?
