Thread: [Finally got a decent phone!](#)

Radiant Harmony - October 11, 2017, 7:24 pm

Just got my Iphone SE in the mail today in rose gold colour and I got to say I love the old design and the fact that it's fast. But setting this phone up makes me realize why I like android better and why I'm getting a galaxy s9 when it drops but for a phone for now it's amazing. Beats my last 2 phones that I broke it's feels so good to get a decent phone man working with shit lower price androids really fucked with my social life but now it'll be alot better!

And I got it for 173 really decent price too?

Killy - October 11, 2017, 8:10 pm

what iPhone did you actually get tho?
no iphone is better than an andriod (my opinion lol)

lwrists - October 11, 2017, 8:10 pm

The iPhone SE has a really smol screen.

B FOR BADASS - October 11, 2017, 8:40 pm

I guess you should have bought google pixel. That is a real deal breaker in my opinion. Camera quality is good. Thanks

jobi - October 11, 2017, 8:44 pm

You could've got a iPhone 6 for \$230 that's what I did when my s7 got stolen

And for people saying galaxy is better yeah your right lmao buy iPhone is more convenient for me because everyone I know has a iPhone for facetime and iMessage and shit

But I got the SE cause it has 6S insides in the 5 body and I loved my 5s it was a great iphone. But it's just a temp phone my s6(better then the Iphone) broke in march and I went thru 3 SHITTY androids made by LG. When the S9 drops in feb/march I'ma cop that and keep the SE as a backup incase anything

The iPhone 5/SE really does have the best iPhone design Apple has ever done. I couldn't go back to it after using the Plus models for the last two years, but I loved the square shape.

it's the same design as the 4

they used basically the same design of iPhone 3g for many generations of iPhones. Yes they had a little difference but you can see the way it evolved.

Arguably the design of the 4 is closer to the SE and was a different enough design than the 3G

Samsung Galaxy S6 Edge is a good one.

-Rben- - October 12, 2017, 4:02 am

although iPhone has a stable OS and is secure, I still prefer an Android because it's way cheaper and provides almost the same quality as Apple if you know which one to buy.
cause I can vouch that OnePlus devices (I've got the OnePlus One) are really durable for their price (I paid +- 200)

BITW - October 12, 2017, 11:12 pm

New or Refurbished one OP?

It's the exact same design as the iPhone 5. The iPhone 4 is 50% thicker and over an 1 inch shorter than the iPhone 5/SE.

Damn you buying cheap iPhones OP. iPhone SE still costs 300\$ here in India.

ciNGi? - October 13, 2017, 12:42 am

Rose gold IMO is horrible haha. Grats on the buy though.

JayL - October 13, 2017, 12:45 am

The iPhone SE was nice. Upgraded to the 7+.

Goods - October 13, 2017, 1:37 am

Congrats OP hope you enjoy it. Should look into maybe a bigger phone when you upgrade. I will never go back to a regular sized phone after using a Plus.

Good idea OP I dont blame you I like the "S" series of phones.

Splice - October 14, 2017, 12:28 am

Sould have gotten the iphone 6 they had for \$200 brand new at walmart

DinamicoBoys - October 14, 2017, 1:09 am

I love my iPhone X .. is the best

sh4dow.gg - October 14, 2017, 4:48 am

I'm buying iPhone6S Plus, the price dropped quite significantly in my region, 7 has no jack, 8 has bad display quality and X is not worth the money. 6S/6S Plus def best phone out there rn.

SE is pretty decent too. Don't update to iOS11 if you havent yet, every1 says it's unstable and with many bugs.

Calogero' - October 14, 2017, 10:33 am

Going to be upgrading from a 5s to a 7 soon, too. Pretty excited!

PhiKay - October 14, 2017, 4:28 pm

I also got the SE, I think it's a pretty good phone
