Thread: [Kurzgesagt In a Nutshell style earth design](#)

atomicguard - October 12, 2017, 7:46 am

Had a go at recreating / copying the banner from
<https://www.youtube.com/user/Kurzgesagt>

I under stand some of the colours are off, and that its not a perfect match. I wasn't trying to make it pixel perfect to the original :) just thought i'd have a go at that clean bubbly art style

The Earth is flat.

In all seriousness, I love how minimalist it is. Maybe try rotating some or all stars 45 degrees and see how that looks?

not only the colors and... the stars for example are also off...

but nice overall

from most people perspective they'll propably wont be able to tell this from the original
