(Sep 21, 2017 01:41 PM)FLEXFORCE Wrote: [\[CITE\]](#) A+ for this tool, works fast and grabs a very good amount of proxies as advertised!

I was able to scrape 84675 Elite proxies!

UI could be a little better but its very easy to use and again works very well!

I definitely recommend picking this up if you need a good proxy scraper!

(Sep 29, 2017 10:51 AM)Forceeyy Wrote: [\[CITE\]](#) Vouch for SystemX and his tool :) he's super friendly and the scraper is simply amazing:

Interface and whole program extremely nice looking and absolutley user friendly + easy to use

You'll get tons of Proxies with it (and you can choose between socks, http & https!!!) and most of them are working perfectly (easily get a 100k Socks-or a 80k http-Lists in a few minutes)

at all this is an awesome Tool and can defenitly recommoned to everyone searching for high amounts of working proxies, very hq ?

New update released. Version 2.4

New checker added that is super fast.

Checker now supports both HTTP and Socks proxys.

Checker displays the speed, anonymity, SSL supported and country location of each proxy.

Just bought and used it. I must say it's a nice tool.

The only thing I was dissapointed at, was the number of SSL proxies generated. I was expecting at least 20 times more than I got.

But for the price I paid I guess it's fine.

The SSL button will be removed in the next update. please use the HTTP proxys and check them, it will now show you what proxys have SSL enabled.

Checker on the tool is down atm, we are currently waiting for a dedicated server to be setup to use for the checking server to give lightning speed checking. Because today is New Year, the dedicated server won't be ready until tomorrow.

Proxy Scraping works as normal still.

Happy New Year

I have no problems with selling this tool for paypal only. Used to accept BTC but stopped that once the fees went through the roof.

If you looked, you would have seen the screenshots on the thread(old ones and needs updating) and a video of the tool would not do it just. No point.

- 1). More private proxys
- 2). A lot faster proxy Checker(Our vps is used for checking, thus the speed is insane)
- 3). GEO location given on the proxy checker
- 4). filter by country
- 5). anonymity level given on the cheker
- 6) Proxy connection speed given on checker)

Shall i go on ?

Well I mean u cant exactly say more private proxies/speed Since u haven't seen/used that one.
Roughly how many proxies can u expect per scrape? And can i use the tool on multiple computers?
Also, do u accept btc cus the fees have lowered?

I go of what many of my customers have said that have both tools.

The checking speed i can assure you, its much faster as we use a vps for the checking service and our own private files for checking, no api shit.

As to the proxy amount to scrape, what do you want, 200k with 1k private proxys and the rest public or 50k proxys with 5k private ? (not exact numbers but an example that the amount scraped has nothing todo with the quality of the tool or proxys.

the checkeralso supports http and socks and finds out if the proxy supports ssl or not.

The tool is hwid locked but you can change the hwid at anytime yourself.

ATM we only accept paypal but that may change later today.

Screeny, just a few proxys there to check

Thanks

Great thanks for the comparison. If you're willing to accept Btc send me a pm. Otherwise I'll wait and see.

As btc fees are around \$0.15

You use the same license on 3 machines, you need to click register the activate to bind the machines to the license key. Any issues you can catch me on my discord.
