Thread: [\[REVIEW\] BOTNET BIBLE - he got fake replies from newbie members who just sign up LOL](#)

**Geass** - October 12, 2017, 1:40 pm

So I was a buyer of this product and I am going to give a honest review since know the method etc.

Product link:

<https://hackforums.net/showthread.php?tid=5784315>

Seller:

<https://hackforums.net/member.php?action=profile&uid=3541319>

Review:

So the method itself can be found, setting up a botnet is something that is not for experts etc, even on youtube there are tutorials, of course on this you might find more things, seller also offers PM support on simple pack, but after you pay he doesn't bother much with you even if he is online and continue selling and replying to people who are interested on his product.

The real thing on this is the support from an expert, but and that you can't see much so if that's what you look, I would recommend to avoid it.

About spreading methods he offer, I have find a lot of better things on public method. torrent spreading is not something secret so as well useless.

In general it is good guide but it doesn't worth over 5\$.

**HUGE NOTE:**

Almost ALL replies are from newbie member who sign up the same day and within their 10 first posts are on his thread,

IS it coincidence?

his 9 pages of selling are fake, take a look on your own.

he probably finds free internet connection (to avoid detections as multi) and make new accounts, JUST A THOUGHT it crossed my mind.

Thanks for reading ?

Thanks for the review. The product had attracted my attention as well because of the support offered. But you know, in HF you have to have second thoughts about every product.

**Rhez** - October 12, 2017, 5:53 pm

I've seen it all and it seems like it's a new technique by the seller to bump their products.
