Thread: [Need a Wordpress daddy to show a naughty boy how its done](#)

**LemonTea** - October 14, 2017, 9:56 pm

New to WordPress (But not a total beginner) and stuck trying to get a few things to work and some general question. Are there any experienced WordPress users that can teach this naughty boy a lesson? Thanks

EDIT:

I'm working on an amazon affiliate site. How it works is it gathers all the items(gym supplement & equipment) on sales on various sites such as amazon, ebay, rogue,etc and puts them all on 1 website. You can check out A similar website, <http://www.dealsource.tech/>, its similar to the site im trying to make. I want a to make a ONE PAGE website but pages like "Checkout", "Cart", and the product page always interfere and i want to get rid of them.

When someone clicks on the product, I want it to redirect the viewer to the ORIGINAL product page(amazon, ebay, etc) but instead, it brings them to the shop product page. I do i go about making it a simple 1-page design without all the other junk interfering.

Conclusion:

i want get rid of this page and the cart logo on top right  
<https://gyazo.com/bc2c35ced3e8ec6808999efa142889be>

And just leave this page as the main page/shop

<https://gyazo.com/a9d9a7d23526f6d4f6bb574f59fc9783>

Plugins:

Woocommerce

Theme: Uncode

Thanks for the help

Well, I think you have received plenty offers, but I want to throw my dice in there. 10+ years in web development, at least three of which dealt exclusively with Wordpress. Currently developing [this personal resume and portfolio](#) on Wordpress.

I'll happily go through your questions with you.
