Thread: [Farber recovery tool](#)

mery_chix21 - October 15, 2017, 4:16 am

I need a safe resource to download Farber tool, I downloaded it from about 10 different websites, And when I scanned it on virustotal I have found that all of the versions are full of viruses and Trojans. So can anyone help ?

Aveling - October 15, 2017, 4:23 am

We recommend you to download the Farbar tool from BleepingComputers.

Download FRST from another computer, it sounds like some malware is being injected into every .exe you download.

Aura - October 15, 2017, 6:55 am

It's normal for certain malware removal tools (such as FRST) to be flagged as malicious on VirusTotal by certain products. It doesn't mean that they are malicious or else. Happens a lot with FRST, AdwCleaner, TFC, etc.

Shelltp - October 15, 2017, 3:56 pm

Could be malware on you computer or your anti-virus detecting it as a virus. Likelihood is anti-virus.

I got my DL from bleeping, and it was flagged by both ESET and Windows defender, however as far as I can see my computer is running well and fixlists work.
