I bought an account for 30 cents to use for Unidays Apple Music discount which is advertised on here although the sales thread doesn't advertise that you must be connected to the college campus WiFi to get the benefits, so from personal experience I've had a negative time with this service.

Contact me to fix this/refund please or I will be opening a report in the next 24 hours.

Edit:

I can confirm I recieved a refund, seller replied quite quickly, although what I noted should be added somewhere in OP for future members who decide to purchase, goodluck with sales.
