Thread: [Anyone using legit-helpers no recoil mouse macros?](#)

DominateYourEnemies - October 16, 2017, 6:16 am

I heard they just updated all the macros yesterday. Anyone actually using them here? How good are the auto fire no recoil macros?

Aese - October 16, 2017, 7:35 am

Yes, I'm using them. Paid \$15 for them or something and it works, definetly, haven't tried their new launcher which makes everything alot easier and simpler, but it's honestly not worth it. The recoil is very simple to control (mainly just drag down your mouse and that should be it) and it is way more fun when you actually learn to control the recoil.

But it works and it's almost an easy kill no matter what.

prodigyhf - October 16, 2017, 1:02 pm

Send me a link to these said macros. I am interested.

Ice Poseidon - October 17, 2017, 7:43 pm

I'm going to cop it in a bit, lets see how it does.

Edit: just bought about to try it out

Wtf this thing is so ass hard 2 configure or im just dumb

OLOY - October 18, 2017, 11:17 am

Why not just use the public no-recoil/autofire macro? it works wonders

prodigyhf - October 18, 2017, 11:51 am

(Oct 18, 2017 11:17 AM)OLOY Wrote: [\[CITE\]](#) Why not just use the public no-recoil/autofire macro? it works wonders

That's what I'm wondering now.

I might just purchase these macros and chargeback if they don't offer anything more than the public scripts/the one I made myself.

SourMan - October 18, 2017, 4:22 pm

theyre trash.. lool idk man recoil is rng in this game

MindyourBusiness - October 18, 2017, 6:17 pm

Yup. They should definitely have a preset pattern.

Tied - October 18, 2017, 6:20 pm

Lol recoil is so fucking easy in this game it's stupid.

Ice Poseidon - October 18, 2017, 8:40 pm

This program is shit do not buy.

SourMan - October 18, 2017, 8:43 pm

not really.. apart from ump where you just pull down, everything else is rng. Vertical is the same for most guns, but horizontal recoil is rng.. literally random and stupid. Takes the skill out of the game, but i guess it good since there will be less macros flying around

MindyourBusiness - October 18, 2017, 8:49 pm

It varies from players to players.

I personally have a bit of a challenge to control my recoil due to limited desk space.

I ordered a new one just to play this game properly ?

SIM-1607106 - October 20, 2017, 5:55 pm

I have them and use them. I'd say they're worth the money, its easy to get public macros but they don't work as well and they're hard to switch based on the gun you're using. The thing that kind of sucks is if you aren't on target with your first shot then you will end up trying to move your mouse while its also trying to move down so you can really fuck up the aim. This is the best advantage you can get right now though without getting invited to a cheat platform and dropping a lot of money.

iprey06 - October 24, 2017, 8:02 pm

Are AHK macros legit? As in working and actually helping in game?

Also.. I assume something like that would be undetectable?

Vince - October 25, 2017, 10:19 am

Someone should definitely leak these as I am not comfortable giving these guys my credit card info
lmfao

SourMan - October 26, 2017, 1:58 pm

Sure, shoot me the macros in a pm.

b7bb00 - October 29, 2017, 10:16 am

No recoil? I got you brah.

Autohotkey basic no recoil (Not mine; found somewhere else)

Code #NoEnv

SendMode Input

~CapsLock::Suspend

~End::ExitApp

~*\$LButton::

Loop

{

GetKeyState, state, Lbutton, P

if state=u

break

mouseXY(3,10)

sleep 1

mouseXY(0,10)

sleep 1

mouseXY(-3,-10)

sleep 1

mouseXY(-3,0)

sleep 1

mouseXY(3,10)

sleep 1

mouseXY(0,-10)

sleep 1

}

return

mouseXY(x,y)

{

DllCall("mouse_event",int,1,int,x,int,y,uint,0,uint,0)

}

M O D E R N - October 30, 2017, 1:40 pm

I have never understood how people can be so bad that they need no-recoil

prodigyhf - October 31, 2017, 9:48 am

If someone wants to reverse engineer this program hmu.

Wuduheck - November 1, 2017, 7:25 am

Has anyone actually tested this one? Looks like legitimate

prodigyhf - November 1, 2017, 10:57 am

(Nov 1, 2017 07:25 AM)Wuduheck Wrote: [\[CITE\]](#) Has anyone actually tested this one? Looks like legitimate

Yeah this script is essentially a "standardized" version of what the Legit-Helpers macros do.

It just moves the mouse a certain amount of pixels on the x and y axis whenever you hold down the mouse button.
