Thread: [\[Experienced\] Coding, reverse engineering, AIO & automation, obfuscation](#)

jordan0159 - October 16, 2017, 10:06 am

Re-opening this for a short period of time due to gaps in my schedule.

Prewarning: My services are not for everyone. My prices are by a longshot not the cheapest. If you want budget, please don't waste my time. However, if you appreciate value, are confident in what you want developed and strive to have only the best, most stable software or websites - then I'm the one for you.

That said...

Need a site made? Want the next big sneaker bot? Need your new software protected against all but the most determined crackers?

If there's something you want, chances are that I can get it done for you.

If you have a question, just ask. I don't bite. Much. :)

My services include (but are not limited to):

Website design/development.

Website optimisation using modern day techniques such as HTTP2.

AIO bots.

API development.

Serverless, auto-scaling infrastructure.

AWS infrastructure and scaling.

Web automation.

Social media bots.

Obfuscation/Advanced custom protection.

Deobfuscation.

Reverse engineering - Android, .Net, ARM, x84 & x64 (iOS as well if you buy me an iphone).

Scraping and data gathering.

App development.

Homework.

Consulting on web design, web infrastructure or software development.

Mentoring.

If you're not sure what you want made, or how something should be executed, just ask. I'll be more than happy to provide a free consultation even if you don't chose to work with me.

payments can be accepted via Stripe through my registered business, paypal or in cryptocurrency. I am very flexible.

Mobb-Deep - October 16, 2017, 11:38 am

Vouch for Jordan probably one of the smartest people I know, knows like mostly every language fluently and learned APP Reing in like 1 month.

Saitama - October 17, 2017, 1:06 am

Vouch for my boi jordan, is very experienced.

McLovin' - October 17, 2017, 11:22 am

Vouch for jordan, extremely experienced RE'er, can literally RE any app/site.

jordan0159 - October 25, 2017, 1:45 pm

Still offering this. Hit me up

Flattering - October 26, 2017, 1:35 am

Hey guy.. Im new on this forum but i was told by a reputable friend of mine that you know your way around coding scripts/bots so if you could add me on Discord or Skype that would be most appreciated. Im willing to be more than generous with compensation if you can complete my request.

I sent a PM but noticed a few people saying PM's are broken (idek). So just posting this as insurance.

jordan0159 - October 26, 2017, 5:21 am

Thanks for letting me know, I contacted you!

SIM-2508228 - October 26, 2017, 5:23 am

Check my previous threads

I have a program request and a reverse engineer request posted

Lmk if you can do either and a price

jordan0159 - October 29, 2017, 1:50 pm

Sent you a pm druze. Still open for projects :)

jordan0159 - November 19, 2017, 5:04 am

Alive and taking orders, need something to do, I'm bored ;)

Space• - November 19, 2017, 5:09 am

What would you charge for an account checker/cracker? (Inputs like Netflix, Spotify, Fitbit, Origin)

oscarfairtex - November 20, 2017, 9:38 am

If you do blackhat Work pm me

rianpi - April 5, 2018, 3:01 pm

hey mate, im after a crack for a particular software, are you still doing this type of work?

thanks

Almighty Koen - June 23, 2018, 1:16 pm

Vouch for my man Jordan. I have known him for some time, really smart guy and he know's what he is doing.

.Batman - June 26, 2018, 12:38 pm

No you didn't. You can't send PM's because you need 25 posts to do so.
Also, no one is saying PM's are broken, that's just pure invention of yours.

OP I wouldn't recommend you to deal with this user, he looks sketchy.
