Thread: [Need Minor Photoshop Work | Removing Reflection](#)

Wheezy Gang - October 16, 2017, 3:58 pm

Recently took a really nice photo of my car, however on the front bumper you can see the reflection of someones brake light. Really love the way the photo turned out, was wondering if someone could attempt to remove that reflection of the brake light. Here's a link to the photo just so you can see what I'm talking about, I'm not sure if Imgur reduces image quality or not but the photo looks better when opened directly on my computer and not on Imgur so I could send a download link for the picture file.
