Send me a message after payment.

Here is my other sale thread about how to spread your botnet or rat files:

virus - October 19, 2017, 7:34 am

Im going to PM you about this.

Any botnet with a form grabber?

MonetizeMaster - October 21, 2017, 12:35 am

Right now only gadoux and litehttp is available. You can check their features from github and hf.
But there isn't form grabber feature on them.

What botnets do you currently have?

still have those two

SuperiorUser - October 17, 2018, 4:01 am

I hate to sales trash but the math just doesn't add up to me.

botnet price: free 1 month

vps: 10 dollars at most

domain: 88 cents

crypt: kind of no point because it will be detected after a day or two.

setup time: 1-5 minutes

kinda pretty expensive but good luck with sales.

MonetizeMaster - October 17, 2018, 5:34 am

domain + vps is already around 10-15 \$ so if you don't want crypt the price is (25\$) fair enough I think.

It is not easy to setup botnets. There are a lot of users asking for this service. And I'm not forcing anyone to buy this service either.

kcommenter - October 17, 2018, 5:46 am

sorry for noob question , but what we can do with the botnet ?

MadGoofy - October 19, 2018, 1:21 am

I'm interested to buy the premium package, can you please confirm I'll be able to renew the VPS directly if I need it?

Just started the contract with you.

thanks

hi mate, sent you a new contract, I'm ready to buy it on selly once accepted! :)

bijenu - October 19, 2018, 8:00 pm

this is really an interesting service. Please would like to know if the premium package include exploit either word or excel

I think he's a bit overloaded now, also mine should be done like 12 hours ago.
Let's wait few hours more, I'm sure he will be back to us soon ;)
