Thread: [The BEST BTC dice gambling analysis website. Coded by me. Always win!](#)

lyft - October 19, 2017, 9:13 am

I'm giving this out to all users in order to prove myself and get a little bit of a reputation here ?

I threw up a website yesterday that does Bitcoin dice analysis and calculates profits. It uses the SAME EXACT method that Bitsler uses to generate odds and random numbers and shows a nice graph to show losses and wins. You can test millions of strategies millions of times and find the absolute best strategy that will work for you.

When it comes down to it, these gambling sites are still odd-based, but I can promise you this will dramatically reduce risk and you will start winning!

Post and/or PM me to get the link, thank you ! ?
