Why do you want to join Terminal?

Well, judging that I have over 35 ebooks for sale here is a pretty big qualifier. Yet, my abilities to be HQ or LQ still are to proper likings of many higher echelon individuals I do believe I can be a perfect shit poster, music poster, gamer, and neckbeared individual. Thus making my application superb and on par with qualifying standards of today's 'norm'

I would like to know if you accept Wendy's 5 free jr frostys coupons as a bribe?

**James Burnham** - October 20, 2017, 1:42 pm

It's a personal topic of interest for me actually.

After I took a break from HackForums, I decided to develop myself outside of internet culture. I guess I was your classic 'HF nerd' kind of guy back then. It's more a group where we can share experiences and avenues to create more well-rounded individuals.

I've got a couple of ideas around this, but I'm still deciding whether to make a private SF. For now, it remains in my lounge.

I've got a couple of ideas around this, but I'm still deciding whether to make a private SF. For now, it remains in my lounge. Alright, sounds good. I like approaching this topic in a serious way, I used to write a lot about self-development but I could not find a way to monetize it and stopped bothering with it. I think that a private SF would be better to filter out meme posts and encourage more thought-provoking conversations.

Interesting point of view.

I agree, it goes to shit when you have trolls and whatnot in there. That being said, I'm not sure there's enough content (or traffic) to justify it's own subforum. We'll see what happens though, I'm sure we'll be gucci

Yea and I thought socialites was going to contribute to the forum, somethings just aren't what they seem.

**Elitas** - October 20, 2017, 2:18 pm

Tell me about yourself. I'm a boring guy who spends most of his spare time on Hack Forums. I'm not much of a gamer, can't play music for my life. But I do appreciate a good game/song. I enjoy arguing/debating my opinions with people who have opposing political views. I type with perfect grammar unless I'm making a low quality 'shitpost'.

Why do you want to join Terminal? Well, I enjoy lounge groups. I've been in at least 1 lounge group for the past few months and it's a great way to meet new people and make partnerships/have fun. It's a place to chill out in too. Firstly, I had The Order which was an amazing group and I had ~800 posts in it after a few months, posting daily/consistently in the lounge. I then had Revolution in which I ran the subforum and was a little busy so I didn't accumulate as many posts (but did post 200 times in 1 day in their lounge). I just enjoy having a lounge group for when I'm really bored and I think 'Terminal' would be an ideal suit for me. Also, your graphics are dope so that's all the more reason for me to apply for this group. Good luck with the group and best of luck to everyone else applying, lounge groups are an amazing experience to be apart of.

About Me:

My day job is as a Systems/Network Engineer. I also have been making all different types of electronic music for the past 8-9 years.

I enjoy some games here and there (currently PUBG and when the PC release comes out Destiny 2). I also am apart of 2 Game Development teams working on some interesting projects.

I'm always trying to learn new stuff, it's fun.

Why do I want to join Terminal?

As the kids would say that userbar is sexy AF and it would aesthetically pleasing. I don't always shitpost, but when I do, I do it with style ([ref #1](#)).

A male from England named Luke, fairly active on the forums nowadays, need a good place to shitpost with others and a group where I can enjoy my time in. I listen to a huge mix of music and gaming is my main hobby, played semi-pro a while ago. I'm pretty average person overall and spend too much time on my computer.

Why do you want to join Terminal? -

It'd be pretty cool to join a genuine lounge group in which I can become active in and meet a group of people I've never really had the chance to talk to before on here. I'm pretty open to discussions about almost anything, personal development has been pretty important to me recently and seems a pretty interesting focus which could allow me to express myself and would be great to chat about with others.

Hey, I'm Lenny. Currently in my resting year, will be attending UCLA studying Business Marketing next year. I really love English (rhetorical analysis wise), and the art of psychology; being able to read people using their body language tone just intrigues me. Another would be reading pieces of

articles and being able to analyze the structure and their mind. The kid side of me always loves to game and chat with fellow others online. I personally take pride in helping others out, supporting others emotionally, and volunteering.. speaking of volunteering: I have a Red Cross event in about a little over an hour.

Many would lie and attempt to circumvent an excuse, but I honestly love the userbar and a good lounge group where I can discuss various topics.

Just sent an application out via User-CP, thanks for the opportunity! Hope to hear from you soon :)

Here's the long version of the application:

I've been gaming since I was 4 years old. To this day, I still play videos and have been making youtube videos/twitch livestreams. I also have been doing graphic design since I started my channels back in 2007 & fell inlove with graphic design. I think around 2012, I started making music in FL Studio.I think I still have my very first song I made on my pc which was Dubstep. I finished one of the songs that took a month I think like 3 - 4 days ago.

It seems like a group that fits me. I see some really nice people to talk to are in it. Would love to get to know some of you guys better & meet members of this forum that I haven't talked to before.

Allow me to explain why I should join.

First some background. I am 18 years old and I have been working with computer from when I was 6. I have a deep rooted curiosity with computers which has led me to always want to learn more, do more, do things I can, do things I can't, etc. I have been on and off with hacking for slightly 6 years now. I am not too good at it but I am good enough.

My interests are what the groups interest in. I am interested in anything related to computers. However, I have a niche for hacking. I like to focus more with malware related activity, penetration testing, Wi-Fi vulnerabilities and web based attacks.

I read up on those quite frequently and have been involved one way or another with those things multiple times now.

I would like to hear what this group is about. More so, I'd like to join. I hope this was enough to get in. Also if anything sounds weird in the message its because I wrote then when I was high earlier.

Thank you, Tacticus

Without a frequent carb supply, your blood sugar can dip too low, leaving you feeling sluggish, irritated and like you can't concentrate.

I would say attacking your enemy when he is feeling sluggish, irritated and when he is not capable of concentrating - is a very good opportunity.

Remember LastSession,  
You enter the forest at the darkest point, where there is no path.  
Where there is a way or path, it is someone else's path. You are not on your own path.  
If you follow someone else's way, you are not going to realize your potential.

They call me El Pusstolero whenever I go back there to, yeah, you guessed it, eat pussy. I ate so much pussy once that I forgot to breathe, died, went to heaven, and got kicked out for eating all the angel pussy. I woke up in the morgue and went straight to prison for what I did up in that bitch right after. I'm sayin don't put me in a morgue you know what I'm about. Shit. **Nuworld** - November 20, 2017, 1:08 am

Tell me about yourself.

Hello all My name is Nuworld

Some may already know of me and who i am.  
For the ones that don't know me I'm here to introduce myself.

My profile is very extensive not only here on Hack Forums  
but in my real life and in my world.

I'm 54 years young.  
I'm a semi Retired Lt. Colonel pilot in the U.S. Air force.  
Though I'm still in the reserves and could be called back to active duty anytime.  
I fought in the Gulf war both in desert storm and Iraqi Freedom.  
I was shot down twice and lived to make this post.  
I am only a small hand full of people that own there own F-16 plane in the U.S.  
I fly F-16, F-15E, A10 warthog.

-----

In my free time, I'm in the air flying my F-16.

As for my Hack forum roles

I joined Hack Forums by pure chance.  
I just stumbled here by doing some google searches one night.  
That was back in 2014.

I'm not going to bore you all with the details of my time here.  
However i can say i worked my up in this forum as many have.

My first group i ever joined was the BrotherHood.  
I then became leader of Enigma and The Marketers.  
Both groups have now been sold and rebranded.

I found myself with out a group.  
Then one day i found a recruitment thread kinda hidden.  
Found this in the Wiki Talks section of Hack Forums.

Recruitment was for writers/journalists for the Hack Forums Wiki.  
Never thought i would get in to this group seeing it's not listed on the HF groups list.

However after waiting for months and not being active i get a welcome PM saying Welcome to the Wiki.

I started at the bottom and i must say, The Writers is hard work and they keep you busy.  
Once again, I worked my way up and now I'm the leader of the Hack Forums Writers/Wiki.

Why do you want to join Terminal?

I feel i have some very valuable skills to bring to the group.  
Both officially and socially.
