Thread: [Shado PRIV8 Service|LEARN HOW TO HACK WITH EASY METHODS | PRIVATE TOOLS|NOOB FRIENDLY](#)

RCE - October 20, 2017, 12:14 pm

On this private course will teach you how to hack with unique techniques (for edu. purpose)

this course includes:

- BOTS.
- Botnets.
- Spreading methods.
- Exploits.
- Increase your earns from CPA/marketing.
- Create robots that can do your jobs when u offline.
- Auto-exploit scripts.
- Hacking Android devices.
- Bypass security of servers.
- premium support.
- other private tools.

Price = 100\$

for contact:

Check my other Services:

[Shado Auto-Spreader!](#)

[Shado Botnet Service!](#)

TOS:

- All sales are final.
- You are not allowed to leak/resell the methods/tools.
- No sale trashing posting or the service will be canceled without any refund.
- i can change TOS anytime.

RCE - November 3, 2017, 9:51 am

Added new methods on the course, if you have any question HMU!

mneef11 - November 3, 2017, 7:53 pm

Hi . I add u on Skype . Please add me malsaqry

RCE - November 4, 2017, 10:50 am

(Nov 3, 2017 07:53 PM)mneef11 Wrote: [\[CITE\]](#) Hi . I add u on Skype . Please add me malsaqry
Added you on skype, and answered all of your questions.

RCE - November 6, 2017, 1:18 pm

New tools have been added to exploit section,message me for more info

Machiatto - November 6, 2017, 9:49 pm

Very interested. How long is this tutorial? I've been attempting to learn for the past four or five weeks while also in the beginning of learning python. Can an absolutely beginner benefit from this guide? How does it work, do we talk to each other over Skype and share screens or something?

Therm?! - November 6, 2017, 9:58 pm

Ah, its nice to see the blatant money grabbing schemes are back on hf!
Lets go down the list!

- Exploits. ---- For starters, I doubt you can program, let alone can code well enough to make your own exploit. If your charging \$100 to tell kids to go to exploit.db you are a cunt.
- Increase your earns from CPA/marketing. -- It's earning, I love the grammar here. Really spooki running CPA!
- Create robots that can do your jobs when u offline. -- Oh boi, you mean you're going to give them a link to learn python the hard way? Kiss my ass.
- Auto-exploit scripts. -- oh boi! Pay \$100 and you get to learn about metasploit....
- Hacking Android devices. -- Again, if you think using some cracked revision of droidsheep is hacking please leave the forum
- Bypass security of servers. -- Wot security? Wot bypass? Wot revisions?
- Ewhoring methods. -- ah, a skill every hacker must have!
- premium support. -- I see, because it isn't expected to pay \$100 and have support right?

RCE - November 7, 2017, 12:23 am

@Therm?!, From your reply it seems ur knowledge about hacking depends on 2011, and I suggest you to keep playing CSGO and stay away from this serious world.

and if we looking to get their money course would be not under 500\$, this just a symbolic price we always call for no monopoly of knowledge, not like other peoples who were behind the money, and ill write what list as We do not like the skeptics:

-Exploits: considered under websites exploits & computers os exploits (exploit codes would be provided) and every section of this would have tools and fully understand how it would work.

-Increase your earns from CPA/marketing: contain effective methods and tutorials about CPA for newbies and medium experience persons to know how can gain more profit.

-Create robots that can do your jobs when u offline.: understand how program running and process states with having knowledge of automata theory and create bots based on it, with easy and unique methods without having great knowledge of programming.

-Auto-exploit scripts: on this section, you will have great tools to exploit your target with the latest vulnerability provided it depends on 2 branches: computers and web servers, And with this tools you will exploit more than one exploit in one click.

-Hacking Android devices: Understand the concepts of Android malware and how it works then generate payloads can do your purpose of the hacking process by using newest effective tools.

-Bypass security of servers: on this section we provide a good understand how the protection of web servers work and what the functions and modules should be enabled on the secured system and understand how could we bypass it and upload web shells or script could take over the whole server to gain root privilege by using private tools coded for that.

-E-whoring methods: this section just for the newbies that want to get some targets by easy methods and it would contain methods and tutorials to reach the specific goal.

-premium support: We keep supporting our customers step by step and solve their issues until they reach their goals not like others sell products/courses without any support.

Therm?l - November 7, 2017, 10:28 am

-Exploits: considered under websites exploits & computers os exploits (exploit codes would be provided) and every section of this would have tools and fully understand how it would work.

Please tell me your qualifications. I doubt you can even tell me the difference between CISC and RISC...

-Increase your earns from CPA/marketing: contain effective methods and tutorials about CPA for newbies and medium experience persons to know how can gain more profit.

So uh, OGAds and buy shout outs?

-Create robots that can do your jobs when u offline.: understand how program running and process states with having knowledge of automata theory and create bots based on it, with easy and unique methods without having great knowledge of programming.

"with easy and unique methods without having great knowledge of programming. " So you gonna give them some copy and pasted source? 10/10

-Auto-exploit scripts: on this section, you will have great tools to exploit your target with the latest vulnerability provided it depends on 2 branches: computers and web servers, And with this tools you will exploit more than one exploit in one click.

Name the tool. If its metasploit or anything else provided inside kali/backtrack please leave the forum.

-Hacking Android devices: Understand the concepts of Android malware and how it works then generate payloads can do your purpose of the hacking process by using newest effective tools.

Literally made 0 sense. Malware isn't hacking... Please stop...

-Bypass security of servers: on this section we provide a good understand how the protection of

web servers work and what the functions

and modules should be enabled on the secured system and understand how could we bypass it and upload web shells or script could take over the whole server to gain root privilege by using private tools coded for that.

so your charging \$100 to tell them to google dork and then SQLi? You skids amaze me...

-E-whoring methods: this section just for the newbies that want to get some targets by easy methods and it would contain methods and tutorials to reach the specific goal.

'targets' Wot? You plan on extorting them or something?

-premium support: We keep supporting our customers step by step and solve their issues until they reach their goals not like others sell products/courses without any support.

It's just sad you have to clarify you offer support

RCE - November 11, 2017, 8:24 am

@Therm?I, u can continue guessing all tools and I can say 98% of tools that u wrote is not we provide to our customers :), cuz we provide unique tools didn't exist on public.

Therm?I - November 12, 2017, 1:31 pm

sure. Explain them. Screenshot them. And then tell me your background

RCE - November 14, 2017, 1:45 pm

(Nov 12, 2017 02:31 PM)Therm?I Wrote: [\[CITE\]](#) sure. Explain them. Screenshot them. And then tell me your background

I won't release pictures for it on public, any serious buyer (not time waster) can contact me on pm and ill send pictures for some tools.

Roblox_BTC - December 29, 2017, 4:48 am

Hello, Interested in buying.. do you have Jabber.. not comfortable with Skype

RCE - December 31, 2017, 9:08 am

messed you about this.

RCE - January 24, 2018, 2:47 pm

Update:

Adding New methods to the course!

RCE - March 13, 2018, 11:17 am

~Update

-New methods have been added.

RCE - March 16, 2018, 5:07 pm

Update:

New exploits have been released in the course.

raigorstonehoff - March 17, 2018, 2:07 am

i want to buy it, even it \$200, but tell me exactly explanation of one topic above,
what do you mean about security of the server? because lot of security on the server,

people dont buy this because you're so have little information, not detailed.

Let me give some example :

Bypass Security of Server

- Bypassing KONA Akamai WAF to perform SQL Injection attack

- blabla1

- blabla2

thats how you sell buddy, and yes, Priv8 is a just fuckin tools that use nowadays bug...
there is no 0day exploits out there with \$100 price

Janndwayne - March 17, 2018, 3:41 am

? ? ? ? ? ? ? ? ? ? ? ?

replied to you about your question.

RCE - April 29, 2018, 5:50 am

Update!

10% Discount for next 5 buyers!

RCE - May 20, 2018, 7:03 am

Next customer will get bounce guides with the course!

RCE - May 25, 2018, 11:26 am

New methods are released ! anyone interested message me here or in skype

MakingMon3y - May 26, 2018, 4:44 am

Posting here to come back later.

mehtevs - May 26, 2018, 3:07 pm

"hey man i would like to ewhore with my botnet scanning exploit"

maybe you should make categories

RCE - May 28, 2018, 12:53 am

Update:

Modified some methods to be easy for newbies.

HMU if you are interested

nvacc2018 - June 8, 2018, 9:35 am

I am interested in this course,pls pm me your btc address so I can pay you(discounted price)..
I will give my review on this later

RCE - July 2, 2018, 1:14 pm

Added u in skype before weeks ,

if u saw my message then u can reply in skype.

FiloData - August 26, 2018, 5:21 am

new tools always being added and old ones getting updated to ensure they work fully (I work for him)

piratedepp - September 19, 2018, 9:55 pm

I'm very interested in talking to you further. I cannot use the PM system due to my lack of posts.

I don't use skype,discord,telegram or wickr it's not worth that hassle.

I can communicate with you one of 2 ways

XMPP (preferred) just reply or send me a PM with the ID and I'll be in touch shortly to have a chat.

Email just send me a PM with an email address.

Either way using PGP is a must.

darkhello - September 23, 2018, 1:44 am

exploits for windows server and internal websites?
