Thread: [stupid LG441g phone...help please?](#)

dajama - October 21, 2017, 5:49 am

i've got am LG441g phone. Piece of junk, i know, but due to certain...restrictions it's all i have at the moment. My first question is, is there any way to update the browser? I think that may solve my other problems too. Like...90% of sites i try to access are unavailable to me. Hotmail, youtube, myspace, ebay...i can't use any of that. Sometimes it tells me "secure connection failed", or "unable to locate host"...is there a way to solve this?I can't post any pictures online. When i tried to upgrade my Yahoo, i'm told that i don't have Javascript, yet i do. There has to be a way to do these things. It makes no sense that i can access some sites, yet not others. Nor does it make sense that i can take pictures, yet not post them. I can't even download any apps! What's the deal?

You could download opera mini.

dajama - October 21, 2017, 6:57 am

what is that? And what will it do?

Outlaw. - October 21, 2017, 7:14 am

It's just another browser, it's lighter and faster than chrome or others.

dajama - October 21, 2017, 8:24 am

thanks for that. I tried it, and i like it. I tried to add to your rep points, but i haven't figured out how to do that yet. My next question is...after i exited my browser to make a call, i can't figure out how to get back into opera. It takes me back into my old browser. An i gonna have to re-download it each time?

Outlaw. - October 21, 2017, 10:29 am

You're supposed to have the app button in your phone, try looking for it.

And no problem, you're a non-upgraded user so rep points can't be given yet until you upgrade to l33t

dajama - October 22, 2017, 6:39 pm

i was able to figure it out. It was listed with my games. Thanks again!
