Thread: [Modern Purple Userscript](#)

Elitas - October 21, 2017, 11:45 am

Hopefully this will stop people getting mad over the Purple Theme getting deleted lol.

I decided to spend a few minutes creating this script (more edits to be added soon, keep looking at this thread).

At the moment it replaces the logo with the halloween one and make the background the same as the modern purple one.

Will be changing the colors to be the same as modern purple, just need the hex code for it. ./

Requires: Tampermonkey/Greacemonkey.

Script:

```
Code // ==UserScript==
// @name      Modern Purple
// @namespace  Elitas@HF
// @description Modern Purple Theme On Hack Forums
// @include   https://hackforums.net/*.php*
// @include   https://hackforums.net/
// @exclude   https://hackforums.net/apikey.php
// @version   1.0.0
// @grant     none
// ==/UserScript==
```

```
var image = document.querySelector("body");
image.style.backgroundImage = "url(https://hackforums.net/images/modern_pl/mosaic.png)";
```

```
let lookup_table = {
  'https://hackforums.net/images/avatars/Oldskool/OldskoolHF8.png':
'https://hackforums.net/images/logo.halloween-2017.png',
};
```

```
for (let image of document.getElementsByTagName('img')) {
  for (let query in lookup_table) {
    if (image.src == query) {
      image.src = lookup_table[query];
    }
  }
}
```

Any suggestions/recommendations would be appreciated. ?

I'm all for change, and fully support what Omniscient is doing.

I only made this to stop people from getting mad over the changes he is doing, so that he can work in peace. If he doesn't appreciate it then I'll happily remove the thread.

Cylow - October 21, 2017, 11:51 am

Please add a preview to the thread. Thanks for making this though. Will check it out tomorrow.

Is there really a need for a preview? I think most of us know what modern purple looks like.

I'll add one anyway.

oRequiem - October 21, 2017, 11:54 am

Pretty cool for you to make, well done my friend.
Hopefully it does make all the drama bs stop lol.

Given the nature of the site, this doesn't really surprise me.

Tbh, I was expecting a different response for this. I was getting bored of reading people giving out over the changes and thought this would solve it.

Just an FYI.

Yes, I noticed that. I had the lounge open because I was planning on creating a thread and got the 2 mixed up. Oh well.

Horus God - October 21, 2017, 12:01 pm

Thanks for doing this, works for me.

I really don't see the problem here. Userscripts have always been around and these are purely cosmetic changes.

It's a technology forum what do you expect?

Elitas - October 21, 2017, 1:04 pm

Just updated the script for the last time. If there is a stronger interest from the community, then I may consider fixing it up to appear more like the Modern Purple theme.

Yes, the hooks I used to have set were changed with this new theme. Will wait to see where Omni goes in terms of the theme before changing it again.
