she was in a lot of pain earlier she went to the hospital.

last thing i heard scared the shit out of me. my dad replied to my sisters question about it "shes not in pain (anymore?)"

I dont know what that means my sister says he just replied "check to see if my car starts" to her when she asked what did that mean, but my dad didnt seem too off when he came home for a second.

I dont know if shes still alive im scared

Pochinki - October 22, 2017, 8:06 pm

If you don't know if she's alive get up and go to the hospital...

CYB3RM4N - October 22, 2017, 8:08 pm

You should probably go to the hospital and see her if you're worried.

Whatever it is, I wish your mum a speedy recovery.

Everyone saying go check on her at the hospital. I can't fucking get there. My dad has the only car, and not like hed let me go there anyway, considering it was his fucking negligence that got her to the hospital 6 hours after she started having crippling pain.

CyberStrike - October 22, 2017, 10:16 pm

Well don't think the worst, he probably was getting an update from the hospital and was relaying to your sister that she was no longer hurting and he is going to see what the doctors have to say. Sending good wishes.

Scriph - October 22, 2017, 10:44 pm

She has pancreatitis. I can't take an uber or anything I'm in a small town, but the hospital is a mile uphill and I don't have a clue how to get to the main building

Savoy - October 23, 2017, 12:00 am

Pick up the phone and call the hospital. Can you do that?

Smile? - October 23, 2017, 12:10 am

Your dad is probably a psycho that likes to scare people.

Unkn0wnUs3r - October 23, 2017, 1:46 am

The hospital is a mile away and you don't know how to get there? If that's so why not use Google maps and walk it.

This is your mother, no?...

I'm assuming you have found out that she's alive right? All honestly, she'll be fine. If nothing was okay, your dad would have told you by now.

digital9 - October 23, 2017, 4:20 am

.....And instead of going to the hospital, you preferred spending time here.

Yea. He found a really shitty way of saying that they gave her pain meds.

She has pancreatitis so she's in a lot of pain but she's. Not dead.

To all the people saying go to the hospital still, whatever, but to anyone that says that if I don't i don't care, fuck them.

digital9 - October 23, 2017, 5:13 am

Surprise, you write all this on a public forum,you say you couldn't go there, call the hospital, but have been posting here continuously and now abusing me.

you wont understand but Please respect people who actually go through such situations instead of trolling here and abusing me. This is not something to be made fun of.

How am I "abusing" you by getting mad at you for saying I don't care about my mother?

Well, the main thing is your mom will just be in pain for a short period of time then back to normal! I wish her a speedy recovery.

"Your the one doing all of this publicly, I'm Not "

I'm done arguing, I can't even comprehend the idiocy there.

Get up of off your ass and go and visit your mother for christs sake. You have the time to post about it on an online forum but not go and see her? I'm calling fucking bullshit. If you're not lying, get up and go, now.

I'm fucking done. It isn't a fucking time thing. I have no means of getting there.. It is 3 seconds to post on a forum. People on hf acted like this when my town flooded too. It takes a fucking minute to post on forums.

CyberStrike - October 23, 2017, 2:25 pm

pancreatitis is rough bud and pretty damn painful, Next time your dad goes tag along I am sure she will appreciate it.
