Has any body confirm it works, bought it but most of the method especially all the exploit doesn't work not even the seller being able to support as he did not even know anything about those methods, saying that he will have to consult some one else whom he claim was the coder but yet to get any person for the past one month now. The money I use to buy it is just a wait on my side as nothing has worked out since I bought it. New buyer should take note not to waist their money unnecessarily

Hard to believe I have to say this here. I do not allow my customers to use money that does not belong to them. We do not condone illegal activity.

This user is a prime example of a fucking idiot who makes the HF marketplace harder for everybody.

I do take steps to prevent sales from fraudulent users but sometimes its impossible to detect. Dont be surprised if the next few customers face a hold of the money so we do not have this problem.

Also his IP: 47.30.112.247

Doesn't even use a VPN when admitting that kind of shit.

All due respect but you bought one of the cheaper guides. The more expensive the guide the more valuable it is obviously. Paypal didn't like your payment for some reason and wanted me to verify my account with a bank account to accept it so I'll have to reject your purchase and have you buy with another currency or try sending payment manually to the same email with friends/family and no note.

If no interview i may just buy a copy for myself as looks like one of the best ebooks based on reviews ive ever seen on any hacking forums.

(Jul 30, 2018 12:49 PM)Biggy Wrote: [\[CITE\]](#) Bought this guide awhile back and my PERSONAL RECOMMENDATION: not worth the money. It's all basic knowledge. Not sales trashing leaving my legitimate review.

Your "review" is invalid because you've never purchased this product before.

I keep track of the hf profile of each customer, I checked and you havent bought it ever.

Biggy is just upset because I was interested in a product he is selling ownership rights to but the price was completely unreasonable, I told hlm such in a respectable manner saying its not in my budget thanks anyways pretty much.

Well I then looked at his sales thread and saw nothing but upset customers saying its no longer working, when I pointed this out on his thread for ownership, he got upset and posted the above.

So to any of my customers.you can completely disregard his post. The vouches speak for themselves and mine are legit unlike what he has on his product.
