Okay so for few hours my eyes were bleeding because of the white theme on HackForums so I made it dark.

I been using it for an hour now and I thought about sharing it with everyone.

If anyone wants to use this css style until Omin <3 gets an updated theme for HF here are the links.

Leave some feedback if you like this better then the white shit.

Ayy good shit. Nice theme :)

**n0\$f3ratu\$** - October 23, 2017, 12:16 am

This is a lot better.

If you can do something like <https://chrome.google.com/webstore/search/hf%20darkness?hl=en-US> (Flat Darkness )would be even greater.

**Eclectic** - October 23, 2017, 12:17 am  
Looks much nicer, good job!

**Pluxo** - October 23, 2017, 12:17 am

Holy fucking shit batman, not another thread about the same shit 15 others have posted!

HF will have a better theme soon so I don't see the point. This is just to solve the white shit but if allot of people want it I could make it a bit nicer.

Omni is already working as crazy on fixing things and update them, so if you have the time to do it then do it... please. ?
