Thread: [\[HELP\] TRIBOT Stuck on Loading Params](#)

Camf ? - October 23, 2017, 9:39 am

So I wanted to start botting, and I bought VIP everything for TRIBOT.

When I go to load the client I get stuck on "Loading CLient Params" it doesn't go past this.
I posted in their forums and still haven't heard anything.
I tried re-installing the latest java. Still Nothing :\
Has anyone had this error?
Here is a video:

I'd suggest continuing to try and find an answer on Tribot forums itself, as opposed to here. Use the search function to see if someone has had a similar problem to you. You'll have a better chance of finding what you're looking for there.

I was just kinda hoping for the best that someone that happens to use tribot on here would stumble across it ;(

Thanks brother ?

Could be your proxy? Try using a different one looks like you have a couple.

Honestly <https://osbot.org/forum/> is a lot better than tribot, check it out fam.

IslahGang - December 27, 2017, 9:25 pm

Probably your proxie is expired?
