#BringbacktheoldHFTheme.

The original iHydra at its prime cold ass theme with the squares. Most members are used to it and it looks better imo than this garbage. I understand work will be needed to be done for mybb 1.8 but still.

OLD THEME OR NO THEME ?

Edit: damn all this criticism, i got shut down real quick ?

Alice Dee - October 23, 2017, 4:04 pm

This theme is an old theme of HackForums.

A lot of people loved it before they changed to the "square" theme.

Charger - October 23, 2017, 4:05 pm

Bezo - October 23, 2017, 4:09 pm

Honestly, I don't think the theme should be the main priority right now lol.

I think that the basic functions of the site should be fixed first.

/wrists - October 23, 2017, 4:09 pm

We just got a makeshift theme. Can you maybe not make a thread like this and demonstrate that you have a little self-control and the world doesn't revolve around you?

Fuck, it's annoying to read these threads even as a member. Wonder what the admin thinks when he reads this thread...

Apart from pretty sure as far as i remember the background wasn't black.

In any case, it's temp, you need to chill out. I'd rather this than that default theme with the white background.

?De?dW?lker - October 23, 2017, 4:11 pm

I like this theme, brings back good memories.

_wind - October 23, 2017, 4:12 pm

So much stuff in this theme is dysfunctional. Colors for members are all off, the subforums are all cluttered and hard to distinguish, text colors don't contrast with the backgrounds.

Idk I just feel like if you don't know what it takes to design a theme you have no room to speak on it till it's done really.

Everything looks like shit when it's in its early stages, the original design doesn't look bad to me but I mean yeah it doesn't look too great right now but it's not finished yet so shit lol.

It might look good on 1.8 but I mean we'll just have to wait and see really

As to the get a life part, kids shouldn't be saying kys on a forum because I stated my opinion on a forum colorway. He got butthurt for no reason and needs to stick his tail in between his legs and walk off this forums. I understand I got butthurt over the theme but still.

I hated the Headache inducing Mosaic tile theme HF had right before the 1.8 Upgrade. This theme where on now may look unfamiliar to you seeing that you where not around when HF used this theme.

This one is easier on my eyes and it reminds me of all the good fun times I enjoyed here on HF.

Royal ! - October 24, 2017, 7:52 am

Can't really say anything much about the themes but the TAB System should be re-implemented PLEASE. It was smooth as heck and it was one of the many great things which distinguished HF from the rest of crappy forums out there.
