Thread: [MacBook Air !!!](#)

AnonLeo - October 23, 2017, 6:40 pm

Hey I have a question is it dumb I'm thinking about getting a 11 inch MacBook Air for hacking I currently have the 2015 MacBook Pro but recently my friend showed me his air and I loved how light it is if i bought a air on eBay that has i5 2.1ghz 128gb which im going to add 1tb ssd card is it possible to hack with?

RichCrispy - October 23, 2017, 6:41 pm

Is it possible to hack to Macbook or hack someone else?

Deany - October 23, 2017, 6:43 pm

If you meant install something like kali linux on it then no, macs have awful linux support. Get a thinkpad if you wanna do teh h4x0ring!11

1. yes do whatever. but follow jabaneses advice and get a refurbished thinkpad t420 or t60.
2. why the fuck are you running kali as main distro.

lol its on a VM

Disparity - October 23, 2017, 9:20 pm

Go for it, only issue is software compatibility which isn't as big an issue as people make it out to be, and obviously if you're running a vm it's just about non-existent.
