No, they're random but mostly occur at 4pm. There are some bets placed on a certain time which is the NHL bets.

You've got PLENTY of time (2-3 hours) to put the bets on.

Great day today:

1 bet was my own, the rest was 100% win.

Lunixunix - November 3, 2017, 3:13 pm

in the history, he is successful.

So it has been 1 week now since I started using this service and I'm pretty happy about it. I, unfortunately, wasn't able to participate for different reasons in the beginning so I missed some bets (All the bets I missed were won by the others). Here are the results, please note that it only reflects my own experience and not necessarily the service itself as you are the one choosing to follow and how to follow a bet. The red bets are my crazy parlays :D :

So in total, I'm at +47,13 euros. I'm signing up for one month this time and will be following all the bets to test the complete service :D

I know we had rough start Roberto but thanks for the service provided!

Friendly advice there can be some people who would find it "funny" to get you kicked, or someone not satisfied with your service,
perhaps remove your Bet365 thread? I hope nobody would even consider it - but you never know..

Good tipsters, professional support and good money in the pocket at the end of the day.

World cup will be hard to predict however I have already started to study all teams and hopefully I will make a good job.

It says 4 games per day, we rarely get more than 2. Some days 0 games.

Win rate is not 85% as promoted on this thread, it is lower.

Last 3 games Ls.

Thanks for the honest review!

Was considering buying, :p

Who knows they might become more active and better win ratio :)

Anyone that could say the winrate for the last month?

My honest review:

Roberto is as promised really good at betting, I cant actually remember a month where we have ended up in minus I really love the crazy winstreak he brings to us specially the one with 17 wins in a row I will never forget it (those who are members knows what I am talking about. The negative thing with Roberto is that the bets he is posting is sometimes 1 hour before the games starts it happens that I miss them sometimes so it would be better if you could post the bets atleast 4-5 hours before the game starts. I am looking forward for the world cup.

Posted some bets for the big games today between Belgium - Brazil and France - Uruguay.

Lets chase some money

lolzers - July 6, 2018, 8:01 am

My observations after paying 20usd for a 7 day trial (this is my first day):

Win ratio is actually 70% not 85% as advertised and currently looking at 6 predictions posted in the last 4 days, less than an average of 2 per day.

Last 10 predictions:-

7 lost, 3 won. 30% win ratio.

Refund requested via support ticket. Significantly not as advertised, maybe it used to be decent but not worth the money at all these days.

Of course results cannot be guaranteed as this is the nature of betting, however claiming a higher win rate than advertised only to see it's actually 70% when you log in is just shady.

Roberto Scorpius Malfoy - July 10, 2018, 1:44 pm

2/2 today, decent win.

Bets for today has been posted for the world cup semifinal!

Hello, we are not a betting company that provides gambling, we are just a company that provide predictions which means we are not forced to have any license to operate.

I have used this guy service for a whole month now. I've bought additional month since the service is very good. Just follow their instructions and you will be in profit for sure. Profit depends on your stakes. This week I've put on William Hill 10GBP + used 2 remaining free bets and cashed out around 50GBP. Since I've fully tested his service I will now start betting with higher stakes (50-100GBP per bet).

Huge vouch for this guy since all of my HF contracts were bit crap until now.

Proof from previous week (I've used 60% of their bet predictions since I was testing first month actually).

You are more than welcome to purchase if you want to try out we have 1-week subscription.

We are doing mostly pre-match betting, sometimes I might post Live-betting on the discord server.

I work for a betting company and we have a department that gives us the verified statistic, they get it by contacting clubs and asking them questions etc..

I work for them as a sports trader, we set the odds for the games, my job with them is basically to read about statistic/games and then set correct odds, so while I am working for them at the same I am working for SportsPrediction since I find value on some games and post them on SportsPrediction while I do my job in bet365, and it happens that I often ask colleagues if they have a good game they can recommend and they always share (all traders have their own sports/league they are working with) I work with the Swedish Leagues.

Yes we do limit the winners, that's how I got my job in Bet365 they limited me and then I applied for the job and got it.

EDIT Sep 2 2020: Review changed please read the latest post on this thread from me.

TLDR: Sports predictions from Robert and his team are profitable if you are consistent with his tips and your bets. Their entire team is very knowledgeable and helpful. I started out knowing nothing about sports or betting. His claim that his predictions are over 70%+ win rate is correct and I verified that with keeping track of all his bets, looking at past predictions, keeping my own records, and doing the math myself. I will continue to purchase monthly subscriptions to his tips as long as I'm making money.

Side Note: The reason this review is so extensive is I was blown away at how helpful Robert was and patient with me. He would message me randomly to check on my progress and answer any questions I had. He deserves a HQ review. Also, some people have given him a hard time about verifying his tips and I wanted to help out with the accusations.

Quick Positives & Negatives I Experienced!

- + Communication with Robert is fast and helpful.
- + Over 4 days there were 18 bets 13wins/4loss/1push which is a 76% win ratio. This stat includes me making betting mistakes and I also missed prediction opportunities that were mostly wins.

Down below you will read that I added up all his past predictions and it also equaled a 76% win rate.

- + Every day had multiple sports predictions.
- + Website was easy to use and all information on it was simple to understand.
- + Discord notifications when a new tip is a great feature that will allow you to catch all his predictions.

- Being in the U.S. I had to stick with limited betting sites that are crypto only. I also had to use a VPN and change my location.
- Bets that are posted might not be available on the site you use. This could make or break your odds that day.
- If you live in the U.S. you would need availability to bet during normal business hours, this wasn't a problem for me since I'm on my PC all day.

Things I Wish I'd Knew/Asked Before a BetBet 5% of the cash your investing and bet the same amount every time.

If you start with \$10 bets like I did some bets have minimums that might exceed that. I haven't seen anything over \$20.

Bet as soon as he posts the prediction to get the best odds.

Ask before you act if you are unsure. Try to do a quick search of terms/guides beforehand if you can.

Most betting sites require you to bet all the money you deposit before you can withdraw it.

If crypto is your route try to use USDT instead of bitcoin as the constant price changes could be hard to work with.

My Betting Sites Experience:Cloudbet is the one I used the most, it was missing some games and bets but was the best I found.

NitrogenSports only has a few bet options but had all the games posted.

Sportsbetting.ag is trash, just stay away.

Verifying Past Predictions

If you buy a membership you can see all of his past predictions. You can only see so many pages as an entire is not kept, kinda odd but I get it is for site optimization and disk space reasons. I was able to see 123 bets from 7-21-20 to 8-13-20 when I joined. That time frame had 68 wins, 52 losses, and 3 pushes. That comes to a 76% win ratio, but these numbers can be modified. I was in this for the long term, so I wanted to make sure nothing was getting changed after the fact. So as I was placing my bets throughout I kept a record of every sport's prediction posted. I checked the past prediction every day for any changes and found nothing. He didn't change the odds, win/loss, description, absolutely nothing. I never told anyone I was keeping track as I wanted to make sure I could trust Robert. There was an error with the system where his bet posted after the game finished, he noticed and removed it and it doesn't show up in the past predictions.

Robert is an honest hard worker, and he is creating win-win situations for everyone.
Thank you, Robert, for the opportunity to make some stable cash.

Sometimes when I mark some bets as a win and some players mistakenly made a wrong bet they always message me saying "Hey why did you mark that as a win"

Depends on the odds. Look at all his predictions see how they have 1.80, 2.00, etc..

That means if you bet \$10 on a 1.80 odd bet you could get \$8 profit with the return of your \$10 totaling \$18.

2.0 is doubling your money, 3.0 is tripling your money, etc..

iChristySilver - September 2, 2020, 5:41 pm

That's why I'm unsure how all of these threads have these "big time" (70%+ WR) sports bettors have such small membership fees. It's because they don't actually bet on their own games, their odds are normally shit (not saying this one in particular), etc.

Why would you ever trust someone that charges \$1/day for their picks. You can spend the same amount of time in the morning (5m) looking up a free article to figure out what sports team to bet on -- maybe with some justification. If these people were actually CRUSHING and WINNING. They'd be betting LARGE sums of money on their OWN games, and not need to sell \$10-\$50/mo memberships lol...

Most "professional" Vegas services, or syndicates, offer somewhere in the \$10/day range, and then try to get you into \$1000+ per season (for a single sport, playing around 2-3 games a day). If you're looking for a "real" (again, they could totally be bullshitting, and also not betting their own games) service, that's the type of stuff you should be looking for.

Odds around: 1.92 Decimal (-108 American) avg is pretty good etc.

Alright, going to post my review after a few days here. Normally if I have a bad experience, I'd let things slide since \$50 doesn't mean too much to me and I don't want to tarnish the seller's reputation. But I think OP here deserves it based on his response.

I'm not sure what's worse, subbing to scammer Vichenzo's service or this guy's . I subbed for 1 month cause he told me a while ago they were doing well and I thought why not for \$50 a month. We had a good first day, up 3 units, and for the next 2 days of tailing I ended up being down 10u.

At this point, I figured it wasn't working. I said in chat things like "lol another losing day" or "I think I'm going to stop tailing". Other discord members also felt the same and Vamps decided to call him out in discord and ask for some answers. OP said things like "they decided to play the worst football game of their life" to "because of coronavirus players can't get the rest they need" to explain the

losses. I can't show the exact convo anymore since he banned me from the discord group, and then proceeded to leave me a -5.

Here's some results from the past few days (images don't seem to be showing):

<https://imgur.com/a/CZeaw2s>

I don't think I can create a scam report since I still have access to this losing service, but I know for a fact I won't be using it anymore. The past few replies also show that this guy doesn't seem to really care about his service anymore so I would advise again you subscribing to it.

I'm only posting this because you seem clueless on the concept of sports betting. "Experts" in the field (which Roberto claims to be) only win games about 60% of the time at best. If you check the page before you (page 34), many people have been complaining about how many games he's actually (not) winning as of late. He plays good odd games though, so if you do win, should be decent profit.

You can check other pages where ppl claim that it is really worth it, just because a few guys complain doesn't mean that it's not good. Also our win rate is not 60% lol..

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.
