Thread: [\[UP TO \\$700/DAY VOUCHERED GC EXPLOIT\] Still selling this unlimited \\$10 GC exploit!](#)

**inv3ctus** - October 25, 2017, 10:52 am

I'm still selling my exploit. Please refer to my previous thread for details.

Link: <https://hackforums.net/showthread.php?tid=5738794>

My previous thread got closed, because I bumped my own thread, which I should not have done. I also lowered the BIN a lot, because I need cash asap to pay for school.

Vouch:

I'd love to see some proof of funds.

Personally I just don't know how I'm feelin with this lol.

We can 'generate' \$10 cards at a rate of 2MB/s ?

Yet you're trying to sell this as project ownership.. which I respect but man even your first thread has nothing to do with any sort of proof whatsoever.

There is absolutely no way you're gonna make 31k in a month with this! But yes, I am earning good money from this, but since I have a lot of cards left, I can sell the script to get these cards. Please read my previous replies before making a shitpost like this.

Then what's a realistic \$\$\$/month to expect from this if selling on eBay? I'm not sure it's possible to get 70 customers a day for this.

It's a reasonable question to ask though. Why do you need to sell this exploit for over \$1k for school if your claims of making \$700/day is legit? In the last 5 days you've been trying to sell this exploit, lowering the price every day or two, you could have made what... \$3.5k? Correct me if I'm wrong, but now I'm not sure if this is worth as much as you claim.

I think a better bet is to sell GCs in bulk. Plus the exploit gets to remain private.

The title states up to \$700. And even that is an estimation. I don't have too much time to sell on Ebay and yes I do sell bulk gift cards, but I can't do this too much to prevent suspicion.

What is even more important to consider, is that I'm not selling any method or Ebook. I'm selling a script to generate GC. The owner of the script can do with it, whatever they want to. So someone who is very good at Ebay gift card marketing most certainly can make a few hundred bucks a day.

But he ofcourse can also choose to resell the actual script and make money like that, which could easily make him even more money

But thanks for your critic, dude!

I got the proof from this member and I do not want to sales trash this sale but what he is offering is nothing new. The "script" that he is selling to get "the stated company" gift cards has been around for hundreds of sites, this is nothing special, ESPECIALLY for the price that its listed for. The script is just a gift card checker tbh, im not gonna lie about what I saw, and the site is nothing special either, there are several sites selling these cards + more from other sites. So if this is what you're offering as the "script" you're not fooling anyone. If its something else, which I wonder what else would it be, please let me know.

I'm not offering "just a GC checker". Yes it checks the codes it makes. But that is just to reassure the card is correct. I actually implemented the algorithm used to create the cards into my script.
