Thread: [Java error why isn't it working?](#)

txkhaar - October 25, 2017, 11:21 pm

Hey all. Been trying to put together a test java script/html page to use into my main assessment task. After spending hours looking for the issue, seems like i can't find it. Here's the code:

Code <html>

```
<head>
<meta charset="UTF-8">
<link rel="stylesheet" type="text/css" href="styles/purchases.css">
<title>Home</title>

<script language="javascript">

function exercise1 ()
{
    var discount = (document.getElementById('DiscountYes').checked);
    var cars = parseInt (document.getElementById('NumCars').value);
    var service = parseInt (document.getElementById('NumService').value);

    var price = 0;

    if ((cars >= 1) && (cars <= 10))

    {
        if ((cars >= 1) && (cars <= 3))
        {
            price = 1000;
        }

        if ((cars >= 5) && (cars <= 8))
        {
            price = 4000;
        }
    }

    if ((cars >= 9) && (cars <= 10))
    {
        price = 4000;
    }

    if (cars == 5)
    {
        price = 5000;
    }
}
```

```

    if (cars == 6)
    {
        price = 22500;
    }

    if (cars == 7)
    {
        price = 222500;
    }

    if (cars == 8)
    {
        price = 5000;
    }

    if (cars == 9)
    {
        price = 22500;

    }

    if (cars == 10)
    {
        price = 222500;
    }

    if (discount)
    {
        discount = 10;
        price = (price) - (price/discount);
    }
    else
    {
        price = price;
    }

}

document.getElementById('output').value = "The cost is: $" + price;
alert("Are these details correct?");

}

```

```

</script>
</head>

```

```

<body>
<div id="wrapper">
  <div id="header">
    <div id="logo">

  </div>

```

```
<div id="statement">
  <h1>Computer Training Rooms</h1>
</div>
</div>
```

```
<div id="links">
<div class="links">
  <span>
    <a href="index.html"></a>
  </span>
  <span>
    <a href="ethics.html"></a>
  </span>
  <span>
    <a href="resources.html"></a>
  </span>
  <span>
    <a href="purchases.html"></a>
  </span>
  <span>
    <a href="feedback.html"></a>
  </span>
</div>
```

```
<div Id="mainJava">
<form id ="dataForm" method="post">
<h3>Appying for Computer Rooms</h3>
<fieldset>
  <legend>Cars</legend>

  <label for="NumCars">Cars</label>
  <select Id="NumCars" name="NumCars">

    <option value="1">Commodore</option>
    <option value="2">Ford</option>
    <option value="3">Astra</option>
    <option value="4">Adventra</option>
    <option value="5">Patrol</option>
    <option value="6">Landcriuser</option>
    <option value="7">BMW 4WD</option>
    <option value="8">Ranger</option>
    <option value="9">MGB</option>
    <option value="10">MGB GT</option>
  </select>

  <label for="NumService">Service Required:</label>
  <select Id="NumService" name="NumService">
```

```
<option value="A">1500Km</option>
<option value="B">5000Km</option>
<option value="C">10000Km</option>
<option value="D">20000Km</option>
<option value="E">50000Km</option>
<option value="F">120000Km</option>
</select>
```

```
</fieldset>
```

```
<table>
```

```
<tr>
```

```
<td>
```

```
<fieldset class="right">
```

```
<legend>Return Customer</legend>
```

```
<label for="DiscountYes" Class="noborder">Yes</label>
```

```
<input class="noborder" Id="DiscountYes" checked="checked" name="Return"
type="checkbox" value="DiscountYes" />
```

```
</fieldset>
```

```
</td>
```

```
</tr>
```

```
</table>
```

```
<br>
```

```
<input class="buttons" type="submit" Id="submit" value="Get Price"
onclick="exercise1()"/>
```

```
<input class="buttons" type="reset" Id="reset" value="Reset"/>
```

```
<input class="message" Id="output" type="textarea" value=" " />
```

```
</form>
```

```
<div id="rightImage">
```

```
<div id="rightTop">
```

```
</div>
```

```
<div id="rightbottom">
```

```
</div>
```

```
</div>
```

```
</div>
```

```
<div class="footer">
```

```
<address>
```

```
<br>
```

```
Mailing Address:<br>
```

```
Phone:<br>
```

```
<h6> &copy; Cert IV Possible Storyboard</h6>
```

```
</address>
```

```
</div>
```

</body>

</html>

it should be printing a result but dosen't matter how many times i check it, Seems like i can't get it to work. Any help would be great thanks!

When you declare the cars variable in exercise1(), you didn't capitalize the B in getElementByld(), you wrote getElementbyld(). I fixed that one line and it seemed to work fine for me.
