Thread: [Clean your desktop!](#)

inv3ctus - October 27, 2017, 8:37 am

Code import os

```
desktop = os.path.join(os.path.join(os.environ['USERPROFILE']), 'Desktop')
clean_folder = 'Shit'
```

```
def clean(from_dir, spec_dir):
    for file in os.listdir(from_dir):
        if not '.lnk' in file and file != clean_folder:
            try:
                os.rename(from_dir + '\\' + file, spec_dir + '\\' + file)
            except:
                pass
```

```
def fu_clean():
    curr_dir = os.getcwd()
    os.chdir(desktop)
    clean(desktop, desktop + '\\' + clean_folder)
    os.chdir(curr_dir)
```

```
if not clean_folder in os.listdir(desktop):
    os.mkdir(desktop + '\\' + clean_folder)
```

fu_clean()*[Github Link](#)*

This code makes a folder on your desktop with all the files and folder that are currently on your desktop, except for the shortcuts!

Perfect for keeping your computer organized!

i just tried it out and it worked!

thank you so much for this share :)

adnankatman - October 27, 2017, 4:36 pm

Awesome, saved to my python_utils folder!

vorticalbox - October 28, 2017, 2:27 am

This will only work on windows, for us Linux folk the desktop folder is ~/Desktop
