Thanks! One vouch copy responded...2 to go.

FBI - October 28, 2017, 1:07 pm

Received a vouch copy, will be testing this method tonight/tomorrow and updating with my review(:

Edit: Seems legit, little confusing for the average joe but he walks you through step by step. BUT If you don't pay with BTC and use a VPN, this service should not be used illicitly as it's still really easy to track you.

aboyio - October 28, 2017, 1:54 pm

(Oct 28, 2017 01:07 PM)billyj3an Wrote: [\[CITE\]](#) Received a vouch copy, will be testing this method tonight/tomorrow and updating with my review(:
Thank you. One more vouch copy to go before I finally put it on the hot list!

SIM-3658605 - October 28, 2017, 3:37 pm

I wouldn't mind taking a vouch copy in return of leaving a review. Let me know!

PowerMTA (the SMTP Brain), video tutorial and pdf tutorial!

(Nov 1, 2017 11:19 AM)samy21 Wrote: [\[CITE\]](#) After setting this up, we need to be spending on SMTP servers or all come pre-loaded with the installation?

all you will need is an openvz vpn server (costs around \$3 for one SMTP IP)

and no, it does not come Pre-loaded with the installation.

with one SMTP IP you send up to 200k daily

(Oct 29, 2017 05:51 PM)enezfamoz Wrote: [\[CITE\]](#) Great service! we have been waiting for this in HF for long and finally is here

Oh yes you are, in order for PowerMTA to function well, you will need a good config setting. The normal config settings the comes with the PowerMTA does not have enough or no bounce rules. However, I was able to use my knowledge of bounce rule to implement it on the software. With it you can use rotation IPs in Interspire, Mumara etc (these are Email Marketing Softwares that use IP rotation), plus other tricks that i have been able to combine to it to make it work. And yes, you might be misunderstanding my service.

EDIT: Working on my 2nd mail server setup. I hope everything goes well

aboyio - November 18, 2017, 11:31 am

(Nov 18, 2017 11:53 AM)Dimeblade Wrote: [\[CITE\]](#) I am going to be very honest with my opinion on this product.

Aboyio SMTP says it send 50k - 500k and also guarantees inbox delivery.

Today I bought vps as exact match as what Abayio used in his Tutorial. (same hosting site as in TUTORIAL)

Followed everything exactly as the tutorials and did all setup.

Everything good so far.

Then after setting up everything I tried sending a test mail using SMTP.

GMAIL : Spam

HOTMAIL : Junk

YAHOO : Inbox

Inbox is not 100% Guaranteed.

and I dont think it does send a lot of emails as advertised. Maybe I am missing something or not.

But I did setup everything just like the way you showed in Tutorial
I spent lots of time giving you support about the inbox rate.

1. You just bought a new domain and openvz server. All new, even a newly designed domain go through scrutiny before its email is off the spamassassin 50% of the time (Email Marketers will attest to this fact).
2. I was always online to give support.
3. I gave told you what to do should in case you wish to have 100% inbox guarantee.
4. I established a fact that since your domain and vps where all newly bought, though with good DKIM authentication, that you needed to do some sorta sending test to get a good reputation and sending limits.

You cannot just start sending unlimited emails with a new created domain that is 0 months old and expect either the spam monitor/IP monitor not to notice it.

Again, the guarantee of your message to enter inbox (although it will get delivered), is sometimes based on your vps provider and the spamminess of your message. For instance you cannot expect a vps provider to shun your message and let it enter inbox if it bears spammy messages where you client send their personal information or malicious executable contents (which of course still delivers, but in spam folder). However, you still get your messages delivered in the spam folder (note: your message still gets delivered). However, it is 100% deliverable to private emails, Yahoo of course takes it inbox, but since Gmail and Hotmail are very strict, they scrutinize their emails and the IP where it is coming from.

Again, a good email deliver-ability is surely based on your email list. Most email lists we send our email messages to are not clean and some of them are spam traps (they are designed to get spammy messages/content and either check to destroy them; links, stubs, etc). This is why it is necessary to clean your email list (whether bought or scraped). I always provided what you needed to clean your email list if you asked me.

A job worth doing, is worth doing well. If you need 100% inbox, you will need to work hard for it to get there if you used my process.

Note: The Youtube video you saw showed that I sent 60K emails which of course most of them went to SPAM (no lies), but I still got responses because most of my clients still check their SPAM folders today.

If the other reviews on this thread shows positive and that it is working for them, I wonder why it is not for you.

Again, you cannot compare my SMTP with a normal cracked SMTP as it will not last, but my SMTP will always deliver unlimited.

Remember, I always gave you support right from the time you bought your package. I explained all these to you and to most customers who asked. If you want to get inbox guaranteed, send your message with less spammy words and content to less recipients (say 1k a day, this is what i do) and good/clean email lists.

A lot of people using POWERMTA know what they get out of it and just so you know I diminished this method to a steal that anybody can afford it unlike the price in the market that is in the high 100s.

Peace.

Dimeblade - November 18, 2017, 11:07 pm

(Nov 18, 2017 12:31 PM)aboyio Wrote: [CITE](#) I spent lots of time giving you support about the inbox rate.

1. You just bought a new domain and openvz server. All new, even a newly designed domain go through scrutiny before its email is off the spamassassin 50% of the time (Email Marketers will attest to this fact).
2. I was always online to give support.
3. I gave told you what to do should in case you wish to have 100% inbox guarantee.
4. I established a fact that since your domain and vps where all newly bought, though with good DKIM authentication, that you needed to do some sorta sending test to get a good reputation and sending limits.

You cannot just start sending unlimited emails with a new created domain that is 0 months old and expect either the spam monitor/IP monitor not to notice it.

Again, the guarantee of your message to enter inbox (although it will get delivered), is sometimes based on your vps provider and the spamminess of your message. For instance you cannot expect a vps provider to shun your message and let it enter inbox if it bears spammy messages where you client send their personal information or malicious executable contents (which of course still delivers, but in spam folder). However, you still get your messages delivered in the spam folder (note: your message still gets delivered). However, it is 100% deliverable to private emails, Yahoo of course takes it inbox, but since Gmail and Hotmail are very strict, they scrutinize their emails and the IP where it is coming from.

Again, a good email deliver-ability is surely based on your email list. Most email lists we send our email messages to are not clean and some of them are spam traps (they are designed to get spammy messages/content and either check to destroy them; links, stubs, etc). This is why it is necessary to clean your email list (whether bought or scraped). I always provided what you needed to clean your email list if you asked me.

A job worth doing, is worth doing well. If you need 100% inbox, you will need to work hard for it to get there if you used my process.

Note: The Youtube video you saw showed that I sent 60K emails which of course most of them went to SPAM (no lies), but I still got responses because most of my clients still check their SPAM folders today.

If the other reviews on this thread shows positive and that it is working for them, I wonder why it is not for you.

Again, you cannot compare my SMTP with a normal cracked SMTP as it will not last, but my SMTP will always deliver unlimited.

Remember, I always gave you support right from the time you bought your package. I explained all these to you and to most customers who asked. If you want to get inbox guaranteed, send your message with less spammy words and content to less recipients (say 1k a day, this is what i do) and good/clean email lists.

A lot of people using POWERMTA know what they get out of it and just so you know I diminished this method to a steal that anybody can afford it unlike the price in the market that is in the high 100s.

Peace.

Exactly what I wanted to hear from Aboyio. Thanks for the detailed info you provided. I will contact you in skype for some help
Thank You ?

mrbones2015 - November 19, 2017, 1:25 pm

For shipments to reach the inbox, you have to do what is called ip heating.

With a new domain and a new vps, you can not send many mails, because you have no reputation and your ip are not heated.

In addition to powermta large spam companies use it in combination with the interprise marketer.

aboyio - November 19, 2017, 2:35 pm

(Nov 19, 2017 02:25 PM)mrbones2015 Wrote: [\[CITE\]](#) For shipments to reach the inbox, you have to do what is called ip heating.

exactly how long does it take to setup this method?

and what about warming up of ip and white-listing our smtp?

you claimed 50k-500k inbox rate guaranteed that's a harsh claim bro are you sure im not trying to bash your thread but

there is more to inboxing than just setting up smtps then sending anyways i wanna make sure before i spend my money

so please clarify

aboyio - December 6, 2017, 8:37 am

It won't take more than 40 mins to set up and after that it will take just 10 mins.

Look around the thread for my recent response to your other questions and you can only contact me for support once you purchase our service.

DoomsRay - December 6, 2017, 2:21 pm

thanks bro but that's too long for me and i found a similar method for free that's way easier and only takes 15 min max to setup pluse totally free just using free trail VPS with internet access good luck on your sales tho bro peace

aboyio - December 6, 2017, 2:30 pm

i dont understand. this method work only for 2-7 days.

what exactly we getting?

aboyio - December 8, 2017, 3:38 pm

(Dec 8, 2017 04:28 PM)aviatsvi Wrote: [\[CITE\]](#) i dont understand. this method work only for 2-7 days.

what exactly we getting?

2 - 7 days is just an estimate it might longer depending if the content in your message is composed in such a way that it will not raise suspicion from your vps provider.

Plus the tools you will need to set it up won't cost you anything more from \$4 - \$9.99 dollars. so compare it to a regular SMTP.

Please check the front page of this thread to see what you will be getting and of course the discussion so far.

you can add me on skype: cpaveit

DoomsRay - December 9, 2017, 7:00 am

bro i wish you success on your sales and my method doesn't need powerMTA it's not necessary if you use a Bulk mailer that uses proxy rotation like AMS Advanced Mass Mailer anyways why don't you scrape emails from online marketing forums then blast them off with your smtp servers you will get more sales that way than only using a sales thread just an idea anyways good luck

aboyio - December 9, 2017, 1:00 pm

Again Aboyio this is not to trash your thread in anyway if you think so. My honest opinion on this.

You know I followed his exact method. Exact match of where he bought his servers and where he got everything else. What I can confirm everyone is that you cant send even 100 mails at once to yahoo without any additional delays. I mailed yahoo cause it was the only provider with inbox results. Other services like gmail and hotmail gets to junk. This is bulk junk mail sender. No inbox guaranteed 100%.

All of these are for advertising purposes the way I see this cause he gives very good reason why it sends to junk cause there is something called ip heating for new servers. Which means 100% NO INBOX guranteed for common email service providers.

Even my first server couldnt send 10k I think. I dont know cause so many many delays in sending. please answer this question too Aboyio

This is powermta cracked, Yes ?

I just want other users to know all these before going into sales.

aboyio - December 12, 2017, 11:36 pm

You fail to even understand the meaning of email marketing. This is no cracked account as this is my license, which i solely bought from Port25 and you can of course contact the individuals that have given a positive review to my method and know for sure if what I am only giving my method out just for advertisement purpose.

Sending unlimited emails up to 500k does not rely solely on the PowerMTA server you have...it solely depends on the VPS server which of course you will need to make a good research to get a good one, not that they are hard to find no, you need to research well to get a good one, because many email marketers have been using this medium even before you came to know about it this year. This information a lone i have given you should serve as a warning to not judge my intellectual/marketing abilities as I do know all about what I am doing and my customers can prove to that. Compared to other sellers out there, I believe mine service is the most affordable if not very affordable to reach.

Why will you still be so ungrateful/selfish/inconsiderate? Fine, if you really got all the tools for free, good, use them. I will even suggest putting them on here in HF and give it out to people for FREE. How About that?

Did you forget to response to the part where i mentioned that you needed my method for FREE, after countless PMs you sent me, saying that you thought what you had earlier was it?

Of course you didn't, but because you where ashamed enough to accept it, he even sent me

countless message to get this. Probably you where one of those Nigerians that always look for free stuff. And by the way you only wanted to use my method to SPAM (Phishing links etc...which i believe i mentioned that i will not be part of).

Do not sales trash my thread anymore.

put work into it, i wonder why you're the only one complaining. Don't just use the search result your find on the first page of google. The tool is very good, namecheap and other vps providers are always there. Don't wait or rely on other people to give you info after they have already done the research. Do your own research and find good vps providers. they are always there. Also add yourself to my discord group.

For those looking for where to host your smtp, you can use Namecheap. They hardly block. But inbox rate is 8/10

Thank you

Alt255 - April 13, 2018, 3:12 pm

Very interesting...thinking about buying..

Do you tutor the method or is it just an ebook?

Is it a smtp hacking method or is it more?

aboyio - April 14, 2018, 9:15 pm

(Apr 13, 2018 03:12 PM)carlos180 Wrote: [\[CITE\]](#) Very interesting...thinking about buying..

Do you tutor the method or is it just an ebook?

Is it a smtp hacking method or is it more?

Method includes:

Video

E-book and

PowerMTA (search google to see the price)

Online now accepting orders and giving support!

buddha168 - April 20, 2018, 5:50 pm

is this SPF? , RDNS? DKIM? show me the headers

aboyio - April 20, 2018, 7:04 pm

(Apr 20, 2018 05:50 PM)buddha168 Wrote: [\[CITE\]](#) is this SPF? , RDNS? DKIM? show me the headers

Yes, all included but with my method

phemmy7000 - April 21, 2018, 9:50 am

But the problem the seller is not willing to do the set up as is much complicated to set up . If you willing to do the set up im interested and ready to even pay for set up fees

aboyio - April 21, 2018, 10:58 am

(Apr 21, 2018 09:50 AM)phemmy7000 Wrote: [\[CITE\]](#) But the problem the seller is not willing to do the set up as is much complicated to set up . If you willing to do the set up im interested and ready to even pay for set up fees

It is boldly written on the ad: Do It Yourself. I only offer support when you are stuck half away. I've been online giving support for about 5 days now.

However if you want me to set it up for you, I charge \$300.

Regardless of my help, the pdf tutorial and video tutorial should aid even a newbie. So I don't understand why you will not have a patient of 30-40minutes to set it up and enjoy your smtp. You are the only person having issues with setting it up.

This is by far, the BEST smtp you can ever get.

It is now delivering to Gmail!

Online and accepting orders.

sprite77 - April 21, 2018, 9:45 pm

I got a good support from this friend.

I pay for his setup and others

And he show the good result

And he doesnt take so long time for set up

I wish always have good cooperation

Im So satisfy do this with him

thanks~

aboyio - April 22, 2018, 2:32 pm

AB33770 - May 10, 2018, 3:16 pm

This is powermta - vesta it is easy to create you just need 1 Server / some IPs / and 100% FRESH Clean E-Mails !

But if E-Mails are blacklisted even the email server its strong but it won't sent it !

I Lost up to 200\$ trying to send but all different isp's won't send it this is how Power MTA Works i mean this E-Mail Marketing..

Any suggest because some of my mails are blacklisted so i really need to send them inbox - spam just Deliverd ??

aboyio - May 10, 2018, 5:44 pm

superm008 - June 18, 2018, 7:49 am

after several study i have given my review : this guide like shit .just copy from power ninja guide ,(but powermta ninja basic guide just 75\$),and the content in the seller guide many error .i am sure the writer isn't familiar with how to setup powermta at the vps .and he isn't a responsible people .how could use this unfinished guide sell for 100\$. in your guide you have said there is a scam page file .but nothing when i asked him .he told me it haven't finished .he still developing .shit .!!

look his desktop i screenshot from the video guide he upload to youtube

:<https://imgur.com/a/SW6a6mx> and <https://imgur.com/a/bwu4WKL>

how could you can expect this guy can provide a quality guide .???!!!!
i can't bear it .it is not about the money . it just waste my time . !!!

aboyio - June 21, 2018, 10:50 pm

I want to get you correctly, are you more concerned of the scam page or the smtp? You never followed my setup and you in fact thought it would work for you while you are in a rush. The rest that bought it never rushed into the tutorial just like you did and they are happy. You can always refer to their testimonies on this thread. Again PowerMTA ninja sales his own method and his guide is not \$75. \$75 is for the basic guide, NO PowerMTA software. He sells his PowerMTA plus guide for \$300 with no support at all. Then if you need support, he sale it for \$700.

Now I'm only offering my method and support for \$100.

Disclaimer: I never copied from anybody I'm a coder myself and a very good one at that. So when you're not able to follow instructions, please do not blame me.

I sold you what took me 2 months to achieve for just \$100 which you will learn within 1 day and still you're complaining. Rome was not built in a day.

It takes Pure wisdom to decipher that which you seek. So if you call my tutorial shit, by all means shows me or us where and how the smtp never worked as a proof. Of course you know the truth and you're only lashing out cos you needed results immediately without using my tutorial.
