How to hack what's app in without victim mobile ...?

And mobile to mobile how to hack what's app without qr code.?

Please give me that tools

On your keyboard, hold CTRL and then press R.

Once the run window has opened, type in "cmd" and hit enter.

Now when CMD has opened, type in "-whatsapp hack3r" and type the victim's phone number after.

Good luck.

Lol,too bad there is no way to hack victim's whatsapp without having their phone.

I dont want to be mean but you should not ask for stupid question because other people in Hack Forum will roast you,make your topic as a joke,etc. ^_^

This is really mean guys,

bruh691 - November 2, 2017, 9:38 pm

I don't it is possible but you can try lol

Tauntn - November 2, 2017, 9:55 pm

Alot of troll's and uninformative "hackers" lol, can do this, but it wont be free for the method nor if you want me to do it for you

gegnaz - May 30, 2019, 5:24 pm

I dont know how it works with this CMD text , can u explain more about that
