Thread: [Anonymous logless browser?](#)

Lonely Haku - October 30, 2017, 7:21 am

Anonymous logless browser? Can anyone suggest one?

JK3E - October 30, 2017, 7:34 am

Firefox, brave + a few installed Add-ons

Which addons on brave

yungdsl - October 30, 2017, 12:59 pm

tor browser bundle from torproject.org

Riddick - October 30, 2017, 1:01 pm

Iridium and/or Brave seem to be popular for that.

Some useful addons: WebRTC Network Limiter, Disconnect, Adblock Plus, uBlock, HTTPS Everywhere

You forgot ScriptSafe beside that these add-ons are a good choice.

Profitspark - October 30, 2017, 7:24 pm

you can use firefox + Disable webrtc + disable webgl + https everywere + you must to block adobe flasf player

Charles de Gaulle - October 31, 2017, 5:04 pm

You can use Tor. Is free, and anonymous.

PvtCipher - November 2, 2017, 5:07 pm

IceDragon, Tor, Iridium, Firefox

If you use firefox based browsers edit some of the parts of the browser and add extensions for increased security and privacy.

Right now I use ISP + VPN + Tor + Tor + IceDragon -> Web

Hi!

OWASP MANTRAS JANUS Browser

It is browsers for Web Penetrations I have used it. I would rate it 9/10

It includes all the ESSENTIAL plugins required.

It offers hackers, all the plugins accessibility in it.

I am not sure about its LOGS. but I do recommend this Browser. Ask me for this browser.
thanks

NOTE* You can use Incognito Browser for Logless surfing (I guess,not sure)
