Out of all the host file sharing websites you can use, you choose these shitty survey ones. You fail.

Cephei - July 29, 2010, 9:12 am

Would go for it, But because of those shitcash sites, i'll give it a miss.

V3xD - July 29, 2010, 9:12 am

Credits?? No? Shitcash? Lammer.

I WOULD NOT TRUST THE STUB DOWNLOADER.... in a month he shall post infected stub, lammers upload to shitcash, and that sounds like something a lammer would do. x)

It's funny how we all get -1 reputation for speaking out our opinion. Typical moderators :P.

No! You're right! Let me just waste a few minutes of my time filling out a useless survey regarding stupid economical rights and THEN, then! I'll download it.

Ever heard of #? Clearly not.

lidoboy - July 29, 2010, 9:50 am

I really don't get why people get so upset when they have to download from Sh!tcash, you're getting the program, basicly for free. It doesn't take long to complete the surveys.

1. Make a new folder on your desktop
2. Extract both files inc the Stub
3. Allow it to connect to the internet (the Stub update is done by web browser with links to download)
4. It should then work.
