Still selling this working glitch, happy to answer any questions!

Tree Hugger - November 4, 2017, 2:16 pm

So if I order like \$6 in food and delivery is around \$5 I will pay \$1? And how often can this be done daily?

Donald Trump Jr. - November 4, 2017, 2:39 pm

(Nov 4, 2017 02:16 PM)Tree Hugger Wrote: [\[CITE\]](#) So if I order like \$6 in food and delivery is around \$5 I will pay \$1? And how often can this be done daily?

Most restaurants with my method have free delivery so just order something around \$10, and you'll be paying nothing. Only \$1 or \$2 if you wanna tip. This can be done as many times as you want a day, I have food coming every 30 minutes.

So I bought this method and was struggling at first and Donald helped me fix it, whole process is

super simple. Only catch is there is a minimum charge of \$0.50 cents unless Donald knows a work around of that. But yeah unlimited free food pretty much.

Hey Donald pm me I have a few questions man

Donald Trump Jr. - February 24, 2018, 7:09 pm

Still got amazing method for sale that works and takes little to no time to setup, less then 20 seconds.

iwu - February 25, 2018, 1:08 pm

At first, before I was buying I was really skeptical about this deal. 5\$ and free delivery is nothing I thought, but in reality it's actually pretty nice. After giving it some thought, this method is pretty useful to me since I can just order it and have it sent to my house while also getting a nice dollar or two off of the original price.

SH?D? - February 25, 2018, 1:42 pm

What happens if its 10 dollars

iwu - February 25, 2018, 1:48 pm

(Feb 25, 2018 02:42 PM)Shademan Wrote: [\[CITE\]](#) What happens if its 10 dollars
Not sure what you're asking here? But if you mean 10\$ off instead of 5\$, then it's even better for you.

SH?D? - February 25, 2018, 2:30 pm

I mean if its \$10 for the order

iwu - February 25, 2018, 2:34 pm

(Feb 25, 2018 03:30 PM)Shademan Wrote: [\[CITE\]](#) I mean if its \$10 for the order
In my experience, if it's around 10\$, then I pay around 6-8\$ for the meal to be delivered to my house.

Donald Trump Jr. - February 25, 2018, 8:22 pm

Still available for sale, if you have any questions please private message me!

Donald Trump Jr. - March 3, 2018, 1:28 pm

Damn, DTJ is kinda sus with the support.

Some background info: I bought this earlier when it used to be 5\$ off and free delivery.

Free delivery hasn't worked for me but OP kept recommending it did work. He said he had friends in my area who tried it and it worked for them and when I told him it didn't I told him to show me proof that it did. I even screen recorded my phone to show it would not work and he didn't accept it, told me I was doing something wrong. I told him it was probably my region, he said to try on a new phone, reset my settings, do all client side stuff which didn't work. I further inquired him on this problem and he said that it did work.

Today I told him to try it out with an address near me and all of a sudden he says, oh yeah only some places give free delivery in your case. In the OP, it states that ".You will get free delivery and \$10 off every order with this method". I do not get free delivery except one place and DTJ told me to only order from there if I want free delivery. He would not help me out any further and said I was blocked from future updates even though I haven't done anything wrong. He has put me on his ignore list and I am stuck without free delivery at all.

This person has been spamming me with messages all day now about the same question in my thread I dont state all places have free delivery but most do. In his specific area only one did, this is not true for most places.

He has been banned from further updates for spamming me with the same question 20 times in a row.

This is my first and last time giving this person attention.

By the way contact me with any question this method is still available and working perfectly. :)

iwu - March 24, 2018, 10:05 pm

FREE DELIVERY for every order. You advertise it like your method gives us the free delivery, that's not the case.

lazyme - March 29, 2018, 9:50 am

I bought this looking at all the great vouches on this thread but honestly wasn't impressed. The free shipping only works if a particular restaurant has introductory offers and deals running. If some restaurant has a standard \$3.99 or \$7.99 shipping, you will still be charged for shipping. Most restaurants in my area do not offer free shipping so this was not worth much for me. The actual system of getting \$10 off stopped working the day after I purchased it. Even if it works again, I still need to pay for shipping and also a \$2-\$3 small order fee if the order amount is less than \$10. The product is not worth the price for me.
