I'm waiting on the dub which is coming out on 11/7. Am I wrong for this? The trailers I saw weren't bad so here I am waiting on funimation to release it.

Since you're new I'm going to give you a heads up and let you know that posting websites that illegally stream services goes against forums policy and is subject to punishment by the HF staff team. In the future be wary of doing that.

@OP up to you whether or not your a fan of dubbed or subbed versions of anime. However regardless, I will say that the subbed version had very good VAs.
