Thread: [Free 4 GB Linux Server from Pulse Servers \(North America\)](#)

Tekkie - November 6, 2017, 12:18 pm

It has been a while since Pulse Servers has had a social presence, so I thought a giveaway was in order.

The next ten Uber members and five Leet members to post on this thread will receive one of our "Linux Four" servers for one month at no cost.

If you would like to continue service with a higher or lower package, we can do that with no downtime. I will also apply a recurring 10% discount.

Information about the servers and the company can be read in my sales thread, which is located in my signature. These servers can not be used maliciously.

This promotion is valid for our North American servers only. Western European servers are not available for this promotion.

That's awesome. We've been around, just not active on any forums. I'm trying to remedy that now.
