Thread: [Scammed by HUSKYY 700\\$ PSN UID=3604532](#)

-ViTALiTY - November 6, 2017, 1:13 pm

We've done a deal before on PSN cards.

I've sent him 350\$ worth, he said only a 50\$ card was working. He had a lot of rep, and I believed it was somehow my fault and someone had stolen the codes, only a 50\$ was working so I sold him that one. He paid, everything was fine.

Yesterday I've sold him 7 100\$ PSN cards for 75% BTC.

He stole them all.

Proof is here:

He made a thread a couple days ago stating his discord/skype were hacked.

Lowkey both times you decided not to wait for me, you got scammed :/

Kamiya - November 6, 2017, 1:47 pm

I did not scam you. I told you to message me on HF even, as all my shit was messed up to (<http://prntscr.com/h72qch>) when you said you were gonna discord me, where we never even dealt before. Always deal on site, especially when I said to message me here (on HF).

A few days ago put this out : <https://hackforums.net/showthread.php?tid=5747686>

As for anyone saying I should secure my shit, my email was accessed, I have no idea how, my shit is "secured" as I have never had this issue. The only way this could have happened in my eyes in someone SE'ing my shit, which I cannot prevent / do not know how to.

I am very sorry if you lost anything, but I did not scam you. I bought over \$1k in PSN yesterday alone totally fine, \$900 off one guy and \$150 off another. I do not scam, nor have any interest in it.

I am sorry you did not PM me here like I said to...sorry does not help, I get that, but I am sorry. As for the 300 codes, those did not work, you told me yourself someone else gave them to you...regardless, I have never scammed you or anyone. I am very sorry V.

This is bullshit.

First the 300\$ that "misteriously" disappeared, and now this shit?

How is it my fault that you cannot secure your own accounts, huh?

And how was I supposed to know what "all my shit was messed up" meant? I'm not stalking your damn posts. Why didn't you link to the thread, why not put something on your signature? Why weren't you more clear on the PM? Why didn't you include a link to the thread for example? This is your fault, not mine.

I told you I was going on Discord. You should have been more explicit and should have cared more, which you didn't.

I have no proof at all that it wasn't you, so I don't believe this.

And one thing's for sure: I'm not doing anymore fucking business with you anymore.

Learnt my fucking lesson, that's for sure. Sorry about that.

Kamiya - November 6, 2017, 2:59 pm

Sorry that happened. I said message me here for a reason I was in a rush, and sorry you don't stalk my threads. Regardless. My sig says deal on site for a reason as well....I did not scam you.

I've got thousands+ in codes, your \$300 did not work, \$50 did. You told me yourself afterwards someone gave you that. Regardless, I did not do this. Look through the pictures, where he said I'm always buying amazon or psn, that should have thrown you off when I knew you had PSN. I had gotten \$900 after you messaged, and you've blown me off before so had no reason to message you.

I'm sorry this happened. But I did not do this. If I come to the conclusion this was my fault, I will pay for it, but from what I can tell it had to be SE or something.

Sorry man. Saying I scammed you, is not correct or true though.

What is true is that IF you were hacked, it was your fault for not securing your own shit and it's even more your fault that you failed to mitigate the problem by properly informing everyone that was dealing with you or about to deal with you.

Should have thrown me off? I don't know you, I don't know what you buy or sell. AFAIK you could buy AGC or BTC or whatever. What I know is that I lost the BTC and I lost 700\$ in PSN cards, all because you failed to properly inform people.

Also, about the 300\$ that didn't work, I did what I had to do. I had no proof that you used them, or that they were stolen, so I took the hit. I apologized, and I took the hit. I was professional, and that's what you are not being here.

And about your sig, is that so? Then why did you let me slide after I've told you I was going on Discord? You gave me your Discord earlier, so I had no reason to think anything was wrong. Also, I wanted to deal with you on Discord to have a proper real-time talk. So I could send you the codes and so that you could test them on the moment, so I could redeem myself from what happened earlier.

Don't lie dude, you won't pay anything. SE your e-mail? You know how hard that is nowadays? You probably got RATted and you either don't know or don't want to admit. Either way, it's a shame and this is fucked up. Lost a lot on money in this.

Honestly, your fault.

I lost \$100 due to his skype being compromised. Not much we can actually do. I believe he is liable but he thinks otherwise. You'll have to make this into a community alert as it doesn't stand valid because it was off-site regardless of whether he confirmed the discord or not.

This is correct. Added him a couple weeks back. A few days ago I made a post saying I lost access, unfortunately even though I thought I was plenty secure I was not. Yesterday he said he was going to discord me and I said, No, message me here on hf cuz of all my shit happening, and he still messaged me there.

I'm sorry for this. But I did not scam you. I made the proper announcements, I made the thread, and I'm sorry I assumed you read it, and I told you not to message there cuz of shit and to message me on hf, that was ignored.

I'm sorry. I'm not being unprofessional, I'm being realistic. I told you to message me on hf and not discord because of my shit and you still did. I'm sorry. I did not scam you. And though I know we will not deal after this, if we did a deal, or even that deal here on site, there's would be 0 issues.

You said that with half words. You were not explicit. You're trying to act like you're not fucking liable when you are the one being completely unprofessional here.

That's what you get for dealing with kids apparently. And stop saying you're sorry and start taking responsibility for your fucking actions. I lost 700\$ because of your irresponsibility.

Oh I haven't? Because all you do is denying responsibility. "I did nothing, it wasn't my fault, I'm sorry". Sorries are not going to bring my 700\$ back.

It was an unfortunate series of events, if you're not lying. I was trying to get to you on Discord, as I said, because I wanted you to test the codes as I was giving them to you. To avoid what happened

last time and so I could redeem myself (even though, as I already said, I took the blame for it and took the hit).

But, if you were more explicit, if you would've link me that thread on a PM, or on your signature or whatever nothing had happened. But you didn't. I don't know what your shit is, I wasn't stalking or posts or anyone's posts.

Fuck, man. Those 700\$ took me a lot of hard work. And denying responsability and keep saying sorry of course it makes me angry, because you could have done something better to prevent this. Not only didn't you do that, but you're not making anything better right now.

I mean I see both sides of the story but in husky defense he did say pm him on hackforums he clearly wanted to deal onsite and instead you started messaging a guy on discord when husky apparently already had threads stating he was compermised on discord and Skype prior. Granted hf hacked scams are becoming more common this one doesn't really seem that way husky did what he could to warn him that his instant messengers where compermised and tried to tell you to pm instead and you didn't listen and proceeded to send this guy on discord the codes. Not sure if there is much you can do. Always deal on site if it's a option

I'm going to make this very very clear. And I'm going to be posting this to a couple places. There have been supposedly 3 scams.

Overview : I made a thread saying how my skype and discord were compromised. Anyone who dealt with the scammer dealt after this thread came, nothing prior, some a couple days after even.

1. Vitality - You messaged me to sell me \$700, keep note I had bought \$900 at the same time, I would never take 700 and not 900, not logical. I wouldn't take \$1 either though. He said he was going to PM me on discord, I said no, message me here (on HF), because of all my shit. Now, I thought Vitality had seen my thread for some reason, regardless if he did or did not, I said not to message me there but here on HF. He never messaged me on HF...I'm sorry but I literally said not to message me there.

2. Cooljames - Me and cooljames last dealt maybe 3 months ago or so? And then this randomly happens. Although I feel bad, you need to message someone / check their rep, something, before just randomly dealing months later.

3. Huncho / Tommy / 10+ Others - A scammer got scammed. A dude who ripped off others and literally was trying to the day he lost \$100 or whatever had not dealt with me in a month +. He had an HF account and failed to message me.

Overall Conclusion : I'm sorry this happened. My shit was secure in my eyes. I wasn't ratted as I don't use a PC. I use mobile, even if that's possible, I don't download shit. Someone pulled off some SE shit is my guess. I'm going to be making it my signature. These are guys I hadn't talked to in months or a guy I told to not message me there as well.

I wish everyone the best in charging back or whatever. But I will leave it at that. You can hate me. Whatever. I'm a legit trader and dealer. Whoever continues trading with me will continue receiving exceptional customer service and care.

This is my last post in the matter. Also, anyone calling me a scammer, should change what they're saying as that is not true at all, and these thread titles are not accurate.

3. It was totally your responsibility what's going on with you account, you can't run like that by saying you was hacked. If any crime or any illegal activity done by my account then police will put me in jail or I say sorry I was hacked and wasn't my fault(They won't give a shit and put me in jail). So it's totally your responsibility to give our money back.

4. you negged me too lol for what? Asking my money that you scammed.

Note- I totally believe you're scammer and you talked with me on skype that you and only me knows, can provide proof too.

We don't need your sorry at all and We can't chargeback that money. We need our back from you otherwise we'll take suitable action and seriously you can't run from that by saying shitty things that you hacked. We sent money to your account and want back now.

My last reply. Nobody was scammed prior (maybe a scammer got scammed though, idk some random guy Tommy) but he contacted me after thread (only one possibly prior).

I never said I don't deal off site, but I did for that thread, I use to deal off site, but everyone (smart cough cough) knows to PM first. I always do, smart people do.

Bye, I am sorry it happened.

Are you a kid? You can't even stand on your words and how many people will you scammed by saying sorry I was hacked, it's not a joke. Better for you give our money back to every user.

Envv - November 8, 2017, 3:02 am

Most likely this kid will get away with it, quite sad. still remember when I got scammed for \$100 by bkrandy, and the kid kept all his rep on the forums and basically got away with it.. it sucks.. Why don't you grab his live IP from skype & try to match it with previous IP's (check resolvers for previous ip's) geolocation and everything - even if he uses a vpn if he didn't change location you can still match it.

You claim I'm someone called Tommy with no proof. You can stop talking shit because I've spoken to Omniscient.

I was scammed before the thread and you're liable. I don't give a fuck. I will make sure no one ever deals with you again.

Envv - November 8, 2017, 3:26 am

You always get caught out

<https://www.reddit.com/user/eCoinLyfe> - huskeys skype is ecoinlyfe2, this reddit account also sells bitcoin with near enough the exact same name, would you look at that?

More proof this is him - <http://prntscr.com/h7qbc7> also selling maden coins.

This reddit user also has a open scam report on reddit!

https://www.reddit.com/r/NBA2kMTselling/comments/6afac9/psa_dont_sell_to_ecoinlyfe_hes_a_scammer_proof_in/

Huskey you've been caught out mate, kid is a fucking scammer. maybe edit this into the original thread so everyone can see what a piece of shit this guy is.

-ViTALiTY - November 8, 2017, 5:14 am

That's him, most probably. It's a fucking shame. At least pay back what you scammed these people for.

Money Man - November 8, 2017, 5:46 am

HF has already gone through this bullshit.
your account = YOUR responsibility

fuckin hicks

And I did PM you before. You weren't clear on what the hell you were talking about. Are you going to keep using the same argument again and again?

You're a fucking scammer. Hope you get banned from here.

I would never had expected this to come from Husky.

I received this message from him on Discord last Sunday:

“hey ! I'm buying and selling bitcoin ! I have \$3800 bitcoin in stock as well as \$880 paypal ! if you need ask me for rates ! some agc in stock !! hurry before it's gone ! Best rates on hf.”

It did not correspond to the usual grammar that I see him typing with, but I didn't take much notice of it.

He could very well have been hacked, but you should never have dealt off site, it never ends well the majority of the time.

I can not say whether Husky is lying or not, but I do think that this could've been avoided if you both took some measures to prevent it from happening.

Husky: Secure your stuff.

Vitality: Don't deal off site.

I hope this gets sorted.

You did not understand why I wanted to deal on Discord.

Last time, I had 350\$ worth of PSN I was going to sell to Husky.

I have tested them before sending them to him. All of them were working.

A few hours later, I was told, by him, only one code was working, a 50\$ code. The rest had been used. I don't know how the hell was this possible, but I took the guilt and lost the 300\$. I had no reason to suspect anything from him.

But next time, as I said to him, I wanted to deal on Discord. I had 700\$ of codes, and I wanted to test and send them to him right away, so that the problem didn't happen again. That's the only reason why.

The reddit scam report was 6 months ago. You're saying you've been vulnerable for 6 months and made 0 alerts at all about it until now?

Repeatedly saying sorry doesn't fix anything, take some damn responsibility. And saying "really good detective work" makes you look like a real cunt. Pathetic...

Envv - November 10, 2017, 8:40 am

Yeah, caught yourself out saying you lost everything with the email when the reddit post is from a few months ago. This user -3'd me aswell. Would be nice to see some people in the community not caring so much about getting -3'd back
