If you're posting on this forum couldn't you have just made a different gif?

Then do it.

actually, you should make the gif big enough to see your tabs, and open an HF tab because I truly just don't believe you lol.

Lol for real.

Alrighty then. Give me a minute to do it.

Updated big fella.

I only pick at you out of HF love

It's fake. When the value on top is the balance in USD the bottom should be the amount of bitcoin owned. Bad inspect element.

Well there goes my experiment.. I've tried to document on how many people will fall for fake shit like this.

All you do you deactivate your internet connection and press the "reload button", as you don't have connected, it won't reload.

Often works when bitcoin value isn't changing either.

Sorry for ruining the experiment with my big mouth.

Value went up from my original post, took the growth factor and multiplied original value. Don't worry, just wanted to use this to follow it up with a report on how easily it is to fake proof and how it's being used all the time around this forum.

That'd work I guess but requires more work which is no point.

aawon - November 7, 2017, 4:40 pm

haha nice prank my dude

you still have more money than me anyways ?

Ravioli - November 7, 2017, 9:44 pm

you better sell all of that before BTC crashes

Sorry to inform but that's my actual balance.

Currently: \$408.90

MadeWithMoney - November 9, 2017, 4:08 am

lol

u got caught...

fuck ur experiment
