Not everything is fixed, but Omniscient is working on it.

The basic things got fixed but over the coming weeks everything should be back to normal.

lol the purple color? the top bar with "forums" "upgrade" "extras" section and the little dots when you hover over them with the little animation and drop down menu

Feels like im playing a need for speed game from 1998

In my opinion i liked the old theme much better, I know there is work to be done but just my opinion.
